As of June 30, 2023 and December 31, 2022 and for the six and three periods ended June 30, 2023 and 2022

Interim Consolidated Statements of Financial Position
Interim Consolidated Statements of Income
Interim Consolidated Statements of Other Comprehensive Income
Interim Consolidated Statements of Changes in Equity
Interim Consolidated Statements of Cash Flows
Notes to the Interim Consolidated Financial Statements

Independent Auditors' Review Report

To the Shareholders and Directors of
Banco de Crédito e Inversiones:

Results from the review of the interim consolidated financial statements

We have reviewed the accompanying interim consolidated financial statements of Banco de Crédito e Inversiones and its Subsidiaries, which comprise: the interim consolidated statement of financial position as of June 30, 2023, and the interim consolidated statements of income, other comprehensive income for the six-month and three-month periods ended June 30, 2023 and 2022; statements of changes in equity and cash flows for the six-month periods then ended, and the related notes to the interim consolidated financial statements (as a whole referred to as the interim consolidated financial statements).

Based on our review, we are not aware of any material modifications that should be made to the accompanying interim consolidated financial statements referred to above, in order for them to be in accordance with the Accounting Standards and Instructions issued by the Financial Market Commission.

Basis for the results from the interim review

We conducted our review in accordance with Auditing Standards Generally Accepted in Chile applicable to reviews of interim consolidated financial statements. A review of interim consolidated financial statements consists principally of applying analytical procedures and making inquiries of persons responsible for financial and accounting matters. A review of interim consolidated financial statements is substantially less in scope than an audit conducted in accordance with Auditing Standards Generally Accepted in Chile, the objective of which is the expression of an opinion on the interim consolidated financial statements as a whole. Accordingly, we do not express any such opinion. In accordance with the ethical requirements relevant to our review, we are required to be independent of Banco de Crédito e Inversiones and its Subsidiaries and to meet our other ethical responsibilities in accordance with the relevant ethical requirements related to our reviews. We believe that the results from the review procedures performed provide a reasonable basis for our conclusion.

Management's responsibility for the interim consolidated financial statements

Management of Banco de Crédito e Inversiones and its Subsidiaries is responsible for the preparation and fair presentation of these interim consolidated financial statements in accordance with the Accounting Standards and Instructions issued by the Financial Market Commission; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of interim consolidated financial statements that are free from material misstatement, whether due to fraud or error.

Report on the Consolidated statement of financial position as of December 31, 2022

On February 27, 2023, we issued an unmodified opinion on the consolidated financial statements as of December 31, 2022 and 2021 of Banco de Crédito e Inversiones and its Subsidiaries which include the consolidated statement of financial position as of December 31, 2022, which is presented in the accompanying interim consolidated financial statements and its related notes.

The above translation of the auditor's report is provided as a free translation from the Spanish language original, which is the official and binding version. Such translation has been made solely for the convenience of non-Spanish readers.

The accompanying notes Nos. 1 to 49 are an integral part of these Interim Consolidated Financial Statements

NOTE 1 – REPORTING ENTITY

a) The Bank

Banco de Crédito e Inversiones (hereinafter “BCI” or “the Bank”) is a company incorporated in Chile, regulated by the Financial Market Commission, hereinafter the “CMF”, in accordance with the amendments to the General Banking Law under Law No. 21.130, which defines this commission as regulatory entity from June 1, 2019 (Official Gazette Publication No. 42.343 of Thursday, May 2, 2019). Its registered office is at Avenida El Golf 125, in the municipality of Las Condes. The Interim Consolidated Financial Statements as of June 30, 2023 and December 31, 2022 and for the periods ended as of June 30, 2023 and 2022, include the Bank and its subsidiaries detailed in the following paragraph, as well as the Miami Branch. The Bank is involved in all the businesses and operations that the General Banking Law allows it, as personal, corporate, and real estate banking, large and medium-sized companies banking, private banking, and asset management services.

NOTE 2 – BASIS OF ACCOUNTING

a) Basis of preparation of the interim financial statements

These Interim Consolidated Financial Statements have been prepared in accordance with the Compendium of Accounting Standards for Banks (CNCB) and instructions issued by the Financial Market Commission (hereinafter "CMF"), a regulatory body that in accordance with Law No. 21.000 that "Creates the Financial Market Commission", provides in number 6 of article 5 that the Financial Market Commission may “set the standards for the preparation and presentation of the annual reports, balance sheets, statements of financial position and other financial statements of the regulated entities and determine the principles to which they must keep their accounting and in everything that is not treated by it if it does not contradict their instructions, they must adhere to the generally accepted accounting policies, which correspond to the technical standards issued by Colegio de Contadores de Chile AG, matching the International Financial Reporting Standards (IFRS) agreed upon by the International Accounting Standards Board (IASB). In case of discrepancies between the accounting principles and the accounting policies issued by the CMF in its Compendium of Accounting Standards for Banks and Instructions, the latter will prevail.

The notes to the Interim Consolidated Financial Statements contain additional information to that presented in the Interim Consolidated Statements of Financial Position, the Interim Consolidated Statements of Income, the Interim Consolidated Statements of Other Comprehensive Income, the Interim Consolidated Statements of Changes in Equity and the Interim Consolidated Statements of Cash Flows.

b) Controlled entities (subsidiaries)

The Interim Consolidated Financial Statements as of June 30, 2023 and December 31, 2022 include the financial statements of the Bank and the controlled companies (subsidiaries). Control is obtained when the Bank is exposed, or has the right, to variable returns from its involvement with the investee and has the ability to influence those returns through its power over the investee.

Specifically, the Bank controls an investee only if it meets the following elements:

- I. Power over the investee (that is, it has rights that give it the current ability to direct the relevant activities of the investee);
- II. exposure, or right, to variable returns from its involvement with the investee; and
- III. ability to use its power over the investee to influence the amount of the investor's returns.

When the Bank has less than most of the voting rights over an investee; but such voting rights are sufficient to have the practical ability to direct the relevant activities unilaterally, then it will be concluded that the Bank has control. The Bank considers all relevant factors and circumstances in assessing whether the voting rights are sufficient to obtain control, these include:

- The size of the Bank’s voting rights relative to the size and dispersion of holdings of the other vote holders.
- The potential voting rights held by the investor, other vote holders or other parties.
- Rights arising from other contractual arrangements.
- Any additional facts and circumstances that indicate the investor has, or does not have, the current ability to direct the relevant activities at the time those decisions need to be made, including voting patterns at previous shareholders' meetings.

The Bank reassesses whether it has control over an investee when the facts or circumstances indicate that there are changes in one or more of the control elements listed above.

Loss of control generates de-recognition of assets and liabilities of the former subsidiary in the Interim Consolidated Statements of Financial Position and the recognition of the loss or gain associated with the loss of control.

The Interim Consolidated Financial Statements consider the separate (stand-alone) financial statements of the Bank and of the companies included in the consolidation and include the necessary adjustments and reclassifications to standardize the accounting policies and valuation criteria applied by the Bank, together with the elimination of all balances and transactions between the consolidated companies.

Additionally, the participation of third parties in the equity of the consolidated Bank is presented as "non-controlling interest" in the Interim Consolidated Statements of Financial Position. Their share of profits for the period is presented as "Profit attributable to non-controlling interest" in the Interim Consolidated Statements of Income for the period.

The following table shows the composition of the entities over which the Bank can exercise control, therefore, they are part of the scope of consolidation:

BANCO DE CRÉDITO E INVERSIONES AND SUBSIDIARIES
NOTES TO THE INTERIM CONSOLIDATED FINANCIAL STATEMENTS
As of June 30, 2023 and December 31, 2022 and for the six and three-month periods ended June 30, 2023 and 2022

BCI Financial Group, INC. and Subsidiaries, parent company of City National Bank (CNB), acquired in 2015. CNB is a financial institution incorporated in 1946 based on the city of Miami, which offers a wide range of financial products, including real estate, commercial and retail banking to more than 61,000 customers, with 32 branches distributed in four Florida counties. Also, during 2017, the Financial Market Commission approved the lease transaction operations through a new subsidiary of CNB on March 10, 2017, through letter No. 02751 issued by this regulatory body. The new subsidiary of CNB is a corporation that started operations on June 28, 2017, under the business name City National Capital Finance, Inc. (CNCF). On August 1, 2018, the subsidiary City National Capital Finance, Inc. (CNCF) changed its business name to BCI CAPITAL, INC.

Servicios Financieros y Administración de Créditos Comerciales S.A., acquired in December 2018, was incorporated as a limited liability company via public deed dated November 4, 1997, and has been subject to various modifications. Its current line of business is /i/ the issuance of credit cards and the performance of activities complementary to said specific line of business authorized by the Financial Market Commission, or the body that succeeds it in its attributions and competences, by means of a general standard to credit card issuers, and /ii/ the granting of general loans as a subsidiary of a bank.

Administradora de Tarjeta Servicios Financieros Limitada, acquired in December 2018, was incorporated as a shareholders' corporation via public deed dated August 6, 1998, and has been subject to various modifications. Its current line of business is the provision of services and the development of all type of activities related to the operation of debit, credit and payment cards with provision of funds, issued in accordance with the Compendium of Financial Regulations of the Central Bank of Chile and other applicable regulations, including but not limited to: /i/ the provision of services linked to the physical issuance of credentials or any other material and immaterial support of all types of payment cards; /ii/ the provision, maintenance and administration of computer channels and systems for the issuance and operation and /iii/ all other types of related, supplementary, required or convenient activities for the issuance or operation of payment cards, to the extent that said services and activities do not involve settlement and/or payment of benefits owed to affiliated entities for the use of said instruments.

Servicios y Cobranzas SEYCO Limitada., acquired in December 2018, was incorporated as a limited liability company via public deed dated December 31, 2010, and has been subject to various modifications.

Its current line of business is: /a/ the provision of prejudicial and judicial collection services regarding all types of payment obligations, whatever their cause or origin; /b/ the provision of collection and payment services in general, including, but not limited to, the collection and payment on behalf of third parties of the payment of all types of accounts and obligations; /c/ the provision of custody services for all types of documents and administrative procedures in general; / d / the provision of marketing services, programming or execution of campaigns, preparation of databases, in all its forms and by all existing means or that in the future will be created for that purpose, all insofar as it is conducive, necessary or recommended for the proper provision of credit collection services; /e/ the provision of services for the collection, storage, custody, administration, processing, studies and analysis of data, background and/or information of any type that is related, comes from, has been provided or is necessary for the development of the services of credit collection, whatever the element or support material of the same, and /f/ acquire or acquire interest in other companies, subject to the requirements and limitations established in the current regulations.

All the activities outlined in the line of business may be performed by the company, by itself or through third parties, by contracting or subcontracting them. For the fulfillment of its purpose, the company may execute all the necessary contracts for the indicated purposes or for the development of its business.

SSFF Corredores de Seguros y Gestión Financiera Limitada, acquired in December 2018, was incorporated as a limited liability company via public deed dated November 17, 2004, and has been subject to various modifications. Its current line of business is /a/ the remunerated intermediation of general and life insurance policies with any national insurance company based in the country and the advisory services inherent to this type of contract with respect to all types of natural persons and legal entities. Notwithstanding the foregoing, the company may perform activities such as home assistance, route and travel assistance, legal and medical assistance, extended warranty regarding goods and services sold or provided by third parties and of a similar nature; /b/ provide pension advisory service, in accordance with the provisions of Decree Law No.3.500, subject to the provisions of article 70 bis of the General Banking Law, or the one that succeeds or replaces it. For the fulfillment of its purpose, the company may execute all the necessary contracts for the indicated purposes, the development of its business or trade or the investment of the funds available to the company.

Banco BCI Perú S.A., was incorporated via public deed dated September 14, 2021, in the Republic of Peru and registered with the Registry of Legal Entities of Lima and Callao on September 28, 2021. Likewise, on August 20, 2021, the Superintendence of Banking, Insurance and Pension Fund Administrators through SBS Resolution No. 02454-2021 authorized the incorporation of the banking company called Banco BCI Perú. The line of business of Banco BCI Perú will be operating as a bank in accordance with the provisions of the General Laws of the Financial System (LGSF) and other applicable regulations.

The Bank may carry out all operations and provide all services through the corresponding modalities and forms that are applicable, as established in the legal provisions that regulate banking companies in Peru.

And without this reference being limiting, it may carry out the operations and provide the services indicated in articles 221 and 283 of the LGSF, as well as in the amending or substituting provisions of said rule. Likewise, it may perform all those operations and services authorized or that may be developed according to its uses, practices and customs that are applicable to banking companies in Peru, including operations of derivative financial products for hedging and/or negotiation purposes, with the prior authorization of the Superintendence of Banking, Insurance and Pension Fund Administrators (SBS).

Additionally, the Bank may enter into other acts and supplementary and related contracts related to the operations it enters into or in which it participates, as well as all acts and contracts that are required for its proper functioning and operation.

i. Entities consolidated by the Bank through other considerations:

Despite not holding the majority of the voting rights and/or not having any interest, the following companies have been consolidated on the basis that the Bank, directly or through some of its subsidiaries, has some type of influence over them:

BANCO DE CRÉDITO E INVERSIONES AND SUBSIDIARIES
NOTES TO THE INTERIM CONSOLIDATED FINANCIAL STATEMENTS
As of June 30, 2023 and December 31, 2022 and for the six and three-month periods ended June 30, 2023 and 2022

Entity	Interest %			
	Direct		Indirect	
	2023	2022	2023	2022
	%	%	%	%
BCI Activos Inmobiliarios Fondo de Inversión Privado (1)	40.00	40.00	-	-
Fondo de Inversión Privado BCI LMV II (2)	100.00	100.00	-	-
Incentivos y Promociones Limitada (3)	EE	EE	EE	EE

- (1) Fund in which the subsidiary BCI Asset Management Administradora General de Fondos SA has influence and/or control.
- (2) Fund that has been organized and constituted by the subsidiary BCI Asset Management Administradora General de Fondos SA, which manages it in its entirety.
- (3) Structured Entity (EE) in charge of promoting credit and debit card products. The Bank has no interest in said company and does not exercise control; however, its revenue depends on the Bank.

c) Associates and joint arrangements

Associates are those entities in which the Bank has significant influence, but no control. Significant influence is the power to participate in financial and operating policy decisions, but not control or joint control over those policies.
A joint arrangement is an arrangement in which there is joint control, which exists only when the strategic decisions of the activities, both financial and operating, require the unanimous consent of the parties sharing control. Investments in joint arrangements may be classified as a business or as a joint operation.

A joint operation is a joint arrangement whereby the parties that have joint control of the arrangement (i.e., joint ventures) have rights to the assets, and obligations for the liabilities, related to the arrangement.

A joint venture is a joint arrangement whereby the parties that have joint control of the arrangement (i.e., participants in a joint venture) have rights to the net assets of the arrangement.

Investments in associates and joint ventures are accounted for using the equity method and are initially recognized at cost, and their carrying amount is increased or decreased to recognize the corresponding share of profit or loss for the period and in comprehensive income. The dividends received are recognized by reducing the investment.

If the acquisition cost is less than the fair value of the net assets of the acquired associate, the difference is recognized directly in profit or loss and is presented under Other Gains (Losses). Investments in associates and joint ventures are presented in the Interim Consolidated Statements of Financial Position under the item “Investment in companies”. Only if the investor has incurred legal or constructive obligations or has made payments on behalf of the associate or the joint venture, should recognize a liability, otherwise, leaving the investment at zero until the moment it generates profits that reverse the negative equity generated previously as a result of the losses generated. Otherwise, a liability is not recognized, but the investment is also left at zero.

The following entities are considered “Associates”:

Company	Interest %	
	2023	2022
	%	%
Redbanc S.A.	12.71	12.71
Combanc S.A.	11.74	11.74

	%	%
Artikos Chile S.A.	50.00	50.00
Servipag Ltda.	50.00	50.00

For companies in which they have less than 20% interest, the Bank appoints a director on the board of such companies, which is why Management has concluded that it has significant influence over them.

d) Equity instruments for minority investments in companies

This caption includes those entities in which the Bank has no control or significant influence. Includes minority permanent investments in companies in the country and abroad that are recorded and presented subsequent to the initial recognition at fair value, with the variations recognized in Other Comprehensive Income in accordance with IFRS 9.

As of June 30, 2023 and December 31, 2022, the Bank presents shares in BLADEx.

Additionally, the Bank presents other equity instruments for minority investments at their acquisition cost less any impairment in accordance with IFRS 9, considering that the cost is a reasonable approximation of the fair value.

As of June 30, 2023 and December 31, 2022, the Bank presents the following investments in other companies: SWIFT shares, and other shares.

BANCO DE CRÉDITO E INVERSIONES AND SUBSIDIARIES
NOTES TO THE INTERIM CONSOLIDATED FINANCIAL STATEMENTS
As of June 30, 2023 and December 31, 2022 and for the six and three-month periods ended June 30, 2023 and 2022

e) Basis of consolidation

These Interim Consolidated Financial Statements comprise the Financial Statements of the Bank and subsidiaries as of June 30, 2023 and December 31, 2022.

The Interim Financial Statements of the subsidiaries (including the entities controlled by the Bank through other considerations) have been standardized in accordance with the standards established in the Compendium of Accounting Standards for Banks and Instructions issued by the CMF.

The uniformity of accounting policies also includes investments recognized under the equity method.

Intra-group balances and unrealized gains or losses arising from intra-group transactions between entities included in the consolidation are eliminated during the preparation of these Interim Consolidated Financial Statements. Unrealized gains arising from transactions with equity-accounted investees are eliminated against the investment to the extent of the Bank's interest in these companies.

The translation of the interim financial statements of the companies with a functional currency other than the Chilean peso is performed as follows:

- a. Assets and liabilities, using the exchange rate effective at the reporting date.
- b. Items in the statements of income and comprehensive income, using the average monthly exchange rate (unless this average is not a reasonable approximation of the cumulative effect of the exchange rates existing on the dates of the transactions, in which case the exchange rate at the date of each transaction is used).
- c. The equity is maintained at the historical exchange rate at the date of its acquisition or approval, and the retained earnings according to letter b above.
- d. The exchange differences arising from the translation of the financial statements are recorded in the caption “Profit (loss) on accumulated adjustment for translation difference” in the Interim Consolidated Statements of Other Comprehensive Income for the Period.
- e. Non-controlling interest

The non-controlling interest represents the portion of gains or losses and net assets, of which, directly or indirectly, the Bank does not own. The non - controlling interest is presented separately in the Consolidated Statements of Income for the period, Consolidated Statements of Other Comprehensive Income for the period and the Consolidated Statements of Financial Position.

f. Functional currency

The Bank has determined the Chilean peso (Ch\$) as its functional and presentation currency, as well as all the Group entities, except for the subsidiaries BCI Financial Group, INC., and Subsidiaries and BCI Securities INC., which have determined the US dollar as their functional currency as well as BCI Peru, which uses the Peruvian sol as its functional currency.

All information presented in Chilean pesos has been rounded to the nearest million.

g. Foreign currency transactions

Balances and transactions in currencies other than the Chilean peso are considered “foreign currency”. Transactions performed by each entity in a currency other than its functional currency are recorded at the exchange rates at the dates of the transactions. During the period, differences between the exchange rate accounted for and that effective at the following collection or payment date are recognized as exchange differences in the Consolidated Statements of Income for the period.

As of June 30, 2023 and December 31, 2022, the Bank's foreign currency assets and liabilities are presented at their equivalent value in Chilean pesos, calculated at the exchange rate of Ch\$801.28 as of June 30, 2023 and Ch\$849.25 as of December 31, 2022.

h. Business segments

The Bank's business segments are determined based on the different business units, considering the following:

- (i) That it engages in business activities from which it may earn revenue and incur expenses (including transactions with other components of the same entity);
- (ii) whose operating income (loss) is reviewed on a regular basis by the unit's highest authority in making operating decisions, to decide on the resources that should be assigned to the segment and evaluate its performance; and
- (iii) in relation to which differentiated financial information is available.

These business units deliver products and services subject to different risks and returns and, therefore, the Bank's key decision-making bodies evaluate their performance separately.

i. Classification and measurement of financial instruments

Financial instruments are classified and measured in accordance with International Financial Reporting Standard 9 (IFRS 9) – Financial Instruments, which established a guide for financial information on financial assets and financial liabilities that will present relevant and useful information to users of the financial statements for its evaluation of the amounts, timing, and uncertainty of an entity's future cash flows.

j. Classification of financial assets

Financial assets are classified into a measurement category based on both the Bank's business model for managing the financial asset and the contractual cash flow characteristics of the financial asset.

In accordance with IFRS 9, the business models are:

- a) Holding assets to collect contractual cash flows: Financial assets held in the business model whose objective is to hold assets to collect contractual cash flows are managed to produce cash flows by collecting contractual payments over the life of the instrument. The business model may be to hold assets to collect cash flows, even if the entity sells financial assets whether there has been an increase in the assets' credit risk; and for sales made to manage credit concentration risk.
- b) Holding assets to collect contractual cash flows and sell financial assets: Financial assets under this business model achieve the objective by collecting contractual cash flows and selling financial assets, which implies a higher frequency and value of sales than the previous business model.
- c) Other business models: the financial assets held in this business are intended to generate cash flows through the sale of the assets. The Bank makes decisions based on the fair values of the assets and manages the assets to realize those fair values.

The evaluation of the contractual cash flows determines if the cash flows of the financial asset meet the SPPI criterion (solely payments of principal and interests), i.e., if the contractual terms of the financial asset generate, on specific dates, cash flows of cash that are solely payments of principal and interest. Principal is the fair value of financial assets at initial recognition, and interest is consideration for the time value of money, the credit risk associated with the outstanding principal, and may also include liquidity risk, administrative expenses, and profit margin.

For the classification process, the Bank performs the SPPI test, which assesses the contractual term to identify if it meets the SPPI criteria, i.e., the contract is a basic lending arrangement. The Bank applies judgment and considers relevant factors such as the currency in which the financial asset is denominated and the period for which the interest rate is set.

The business model refers to how the Bank manages its financial assets to generate cash flows. The Bank determined its business model in the initial application of IFRS 9 at the level that best reflects how it manages the groups of financial assets to achieve its business objective.

The Banks' business model is not assessed instrument by instrument, but at a higher level of aggregate portfolio and is based on observable factors such as: the performance of financial assets, the risk that affects performance and the expected frequency, value, and time of sales.

i. Classification of financial liabilities

The Bank classifies all financial liabilities as subsequently measured at amortized cost, except for derivatives that are liabilities, which are measured at fair value through profit or loss.

ii. Reclassification

The reclassification of financial assets is required when, and only when, the objective of the Bank's business model to manage these financial assets changes. Financial liabilities cannot be reclassified.

iii. Initial Measurement

At initial recognition, financial assets and financial liabilities are measured at the transaction price, i.e., the fair value of the consideration given or received (IFRS 13). In the case of financial instruments that are not at fair value through profit or loss, transaction costs are directly attributable to the acquisition or issue of the financial asset or financial liability.

iv. Subsequent measurement of financial assets

After initial recognition, the Bank shall measure a financial asset at:

- a) Financial assets at amortized cost (CA)

Financial assets that are held in a business model to collect contractual cash flows and contain contractual terms that give rise to cash flows that are SPPI on specific dates, are measured at amortized cost.

The effective interest method is used in calculating the amortized cost of a financial asset or financial liability and in allocating and recognizing interest income or interest expense in profit or loss during the relevant period. The effective interest rate is the rate that exactly discounts the estimated future cash payments or receipts through the expected useful life of the financial asset or financial liability to the gross carrying amount of a financial asset or the amortized cost of a financial liability.

The caption financial assets at amortized cost presents the following:

- Rights for repurchase agreements and securities lending
- Debt financial instruments
- Loans and advances to banks
- Loans and receivables from customers

b) Financial assets at fair value through other comprehensive income (FVOCI)

- Debt financial instruments

Financial assets that are debt instruments held in a business model that is achieved through collection of contractual cash flows and sale, and that contain contractual terms that give rise to cash flows that are SPPI on specific dates, are measured at FVOCI. Subsequently, they are re-measured at fair value and changes in them (except those related to impairment, interest income and foreign currency gains and losses) are recognized in other comprehensive income, until the assets are sold. At the time of disposal, the accumulated gains, and losses in OCI are recognized in the statements of income.

- Equity financial instruments

For certain equity instruments, the Bank may make an irrevocable election to present in other comprehensive income subsequent changes in the fair value of the instrument, except for dividend income that is recognized in profit or loss. Gains or losses on the derecognition of these equity instruments are not transferred to profit or loss.

c) Financial asset held for trading at fair value through profit or loss (FVPL)

Includes financial assets whose business model aims at generating benefits through purchases and sales or generate short-term profit or loss. Financial assets that do not contain contractual terms that give rise to cash flows that are SPPI on specific dates, or if the financial assets, is not held in a business model that is (i) a business to collect the contractual cash flows or (ii) a business model that is achieved by collecting the contractual cash flows and selling them.

Gains and losses are recognized in the statement of income under financial income for financial assets held for trading at fair value.

- Derivative financial instruments

Derivative financial instruments are also classified under financial assets at fair value through profit or loss, which include foreign currency forwards and Unidades de Fomento, interest rate futures, currency and interest rate swaps, currency options and interest rate and other derivative financial instruments, are initially recognized in the Interim Consolidated Statements of Financial Position at their fair value (including transaction costs), except for those classified as level 3 of the hierarchy (when applicable), and subsequently measured at its fair value. The fair value is obtained from market quotations, cash flow discount models and option valuation models, as appropriate. Derivative contracts are reported as an asset when their fair value is positive and as a liability when it is negative, in the line “Financial derivative contracts” under the caption financial assets held for trading at fair value through profit or loss.

The purpose of the credit valuation adjustment (CVA) is to determine the expected losses due to counterparty risk in OTC derivative contracts. The CVA of a derivative is defined as the difference between the value of the derivative free of counterparty risk (equivalent to the original derivative but without risk of default by any of the parties) and the value of the risky derivative (which corresponds to the original derivative, which has an inherent risk) that considers the possibility of default by the counterparty. In this way, the CVA of a client can be obtained from the expected exposure (EE) due to counterparty risk (how much is expected to lose) and the expected loss rate (EP) associated with the default of the counterparty.

The valuation adjustment due to the existence of the bid-offer spread in the financial instrument markets that is applied to all financial instruments that are recognized at their market value both under normal market conditions and under financial stress conditions, is based on the best practices, the recommendations of the Basel Committee and the requirements of the CMF and the Central Bank of Chile.

In order to carry out the bid-offer adjustment to the valuation of financial instruments belonging to Banco de Crédito e Inversiones own portfolios, the following methodology was established:

i. Define condition of market makers or customer of the Bank

On an annual basis, the condition of the Bank will be redefined to be considered market makers (the Bank must be among the 4 main market operators) or clients in each of the financial products that it operates.

This will be done with information from the two main brokers in the national market: Tradition and ICAP.

ii. Condition of market makers

For products (markets) where the Bank is a liquidity provider, they will be valued at mid-price and no bid-offer adjustment will be made to their valuation.

iii. Condition of customer

For products (markets) where the Bank is considered that the Bank is a requestor of instruments of a different nature, they will be valued at mid-price and the bid-offer adjustment will be made to their valuation or they will be valued at bid if there are liquid peaks.

The Bank also makes an adjustment associated with the FVA (Funding Valuation Adjustment) financing risk was added, which captures the financing differential of unsecured derivatives above the risk-free rate and other technical considerations.

iv. Subsequent measurement of financial liabilities

After initial recognition, the Bank will measure a financial liability at amortized cost.

v. Derecognition of financial assets and liabilities

Financial assets are derecognized when, and only when:

- The contractual rights to the cash flows of the financial asset expire, or
- The Bank transfers substantially all the risks and rewards of ownership of the financial asset, and therefore the Bank derecognizes the financial asset and separately recognizes the rights and obligations created or retained in the transfer.

In some cases, the Bank enters into transactions for which it retains the contractual rights to receive the cash flows of the financial asset, but assumes the contractual obligation to pay the cash flows in an agreement that meets all the required conditions, that is, the Bank only transfers amounts collected from original assets, the sale or pledge of original assets is prohibited, and the Bank is required to remit the cash flows collected without significant delay.

When a financial asset is sold and the Bank agrees to buy it (or an asset that is substantially the same) at a fixed price at a future date, the Bank continues to recognize the financial assets in full in the statements of financial position, because it retains substantially all risks and rewards of ownership. The cash consideration received is recognized as a financial asset, and a financial liability is recognized for the obligation to pay the repurchase price.

Financial liabilities are derecognized when, and only when, they are discharged, canceled, or expire.

vi. Impairment of a financial asset according to IFRS 9

The Bank applies the value impairment requirements for the recognition and measurement of a loss allowance to financial assets according to the model of "expected credit losses" (ECL) to assets financial assets measured at amortized cost and fair value through other comprehensive income (FROCI), excluding loans ("Loans and advances to banks" and "Loans and receivables from customers commercial, residential and consumer "), of the caption "Financial assets at amortized cost", or on “Contingent Loans”, since the criteria for these issues are dealt with in accordance with Chapters B-1 on provisions for credit loss B-3 on contingent loans of the Compendium of Accounting Standards for Banks, respectively.

The new model uses a dual measurement approach, whereby the loss margin is measured as:

- 12-month expected credit losses.
- Lifetime expected credit losses.

The measurement basis depends on whether there has been a significant increase in credit risk since initial recognition. In accordance with changes in credit quality since initial recognition, IFRS 9 describes a “three-stage” impairment model according to the following table:

Change in credit quality since initial recognition		
Stage 1	Stage 2	Stage 3
Initial recognition	Significant increase in credit risk since initial recognition	Credit-impaired assets
12-month ECL	Lifetime ECL	Lifetime ECL

At the end of each reporting period, the Bank assessed whether the credit risk of financial instruments has increased significantly since initial recognition or whether an asset is considered credit-impaired and, consequently, is classified as a financial instrument at the respective stage:

- Stage 1: Financial assets that have not significantly increased their credit risk with respect to their assessment at origination. 12-month ECL are recognized.
- Stage 2: When a Financial asset has shown a significant increase in credit risk since origination, the Bank records an allowance for lifetime ECL. Loans in this stage also include facilities, where the credit risk has improved, and the loan has been returned to stage 2.
- Stage 3: Financial instruments that are considered to be in default are included in this stage. Similar to stage 2, the allowance for credit losses is made on the basis of the expected credit losses over the life of the instrument.

The Bank considers reasonable and supportable information that is available without undue cost or effort and that may affect the credit risk in a financial instrument, including forward-looking information to determine a significant increase in credit risk since initial recognition. Forward-looking information includes past events, current conditions, and forecast of future economic conditions (macroeconomic data).

Credit risk assessment and forward-looking information (including macroeconomic factors), includes quantitative and qualitative information based on the Bank's historical experience, some examples are:

- i. Financial or economic conditions that are expected to cause a significant change in the borrower's ability to meet its debt obligations.

BANCO DE CRÉDITO E INVERSIONES AND SUBSIDIARIES
NOTES TO THE INTERIM CONSOLIDATED FINANCIAL STATEMENTS
As of June 30, 2023 and December 31, 2022 and for the six and three-month periods ended June 30, 2023 and 2022

- ii. An actual or expected internal credit rating downgrade for the borrower or a behavioral rating downgrade.
- iii. An actual or expected significant change in the operating results of the borrower.
- iv. IV. Significant increases in credit risk on other financial instruments of the same borrower.
- v. Significant changes in the value of the collateral supporting the obligation or in the quality of third-party guarantees or credit enhancements.
- vi. Reductions in financial support from a parent entity or other affiliate.
- vii. Expected changes in loan documentation, including expected breach of contract that may lead to covenant waivers or amendments, interest rate step-ups, requiring additional collateral or guarantees, or other changes in the contractual framework of the instrument.

I. Measurement of expected credit losses

ECLs are a probability-weighted estimate of credit losses, i.e., the present value of all cash shortfalls.

A cash shortfall is the difference between the cash flows that are due to an entity in accordance with the contract and the cash flows that the entity expects to receive. The three main components for measuring the ECL are:

PD: The probability of default is an estimate of the likelihood of default over a particular time horizon. A default can only occur at a certain time during the evaluated period if the operation has not previously been derecognized and is still in the portfolio.

LGD: The loss given default that arises in the event that a default occurs at a given time. It is based on the difference between the contractual cash flows due and those that the lender would expect to receive, even from the realization of any collateral.

EAD: Exposure at default is an estimate of exposure at a future default date, considering expected changes in exposure after the reporting date, including repayments of principal and interest, whether contractually scheduled or otherwise, the expected withdrawal of the committed facilities, and accrued interest for late payments.

To measure 12-month and lifetime ECL, cash shortfalls are identified as follows:

- 12-month expected credit losses: the portion of lifetime expected credit losses that represents expected credit losses that result from default events on a financial instrument that are possible within 12 months after the reporting date.
- Lifetime expected credit losses: the expected credit losses that result from all possible default events during the expected useful life of a financial instrument.

A financial asset is assessed at each reporting date to determine whether there is objective evidence of impairment. Such asset is impaired if there is objective evidence that one or more events have had a future negative effect on the asset.

An impairment loss in respect of financial assets measured at amortized cost is calculated as the difference between the carrying amount of the asset and the present value of the estimated cash flows, discounted at the effective interest rate.

An impairment loss in respect of a financial asset at fair value through other comprehensive income is calculated by reference to its fair value.

All impairment losses are recognized in the Interim Consolidated Statements of Income for the Period. Any accumulated loss in relation to a financial asset at fair value through other comprehensive income previously recognized in equity, is transferred to the Interim Consolidated Statements of Income for the Period.

An impairment loss is reversed only if it can be related objectively to an event occurring after it was recognized. The reversal of an impairment loss cannot exceed the carrying amount that could have been obtained had no impairment loss been recognized for that asset in prior periods. The reversal is recognized in profit or loss for the period, except for financial assets at fair value through other comprehensive income, in which case the accumulated impairment loss recognized in other comprehensive income will be reclassified from equity to profit or loss as a reclassification adjustment, even if the financial asset has not been derecognized.

k. Operations with reverse repurchase, repurchase and securities lending agreements

Reverse repurchase agreement operations are performed as a form of investment. Under these agreements, financial instruments are purchased, which are included as assets in the caption “Repurchase agreements and securities lending”, which are measured according to the agreed interest rate.

Repurchase agreements are also performed as a form of financing. In this regard, investments that are sold subject to a repurchase obligation and that serve as collateral for the operation, are part of their respective captions "financial assets at fair value through profit or loss" or "financial assets at fair value through other comprehensive income”.

l. Financial derivative contracts for accounting hedges

The Bank has chosen to continue using the guidelines of IAS 39 for hedge accounting. If the derivative instrument is classified for hedge accounting purposes, it can be: (1) a fair value hedge of existing assets or liabilities or firm commitments, or (2) a cash flow hedge related to existing assets or liabilities or expected transactions. A hedging relationship for hedge accounting purposes shall meet all the following conditions: (a) at the inception of the hedge, there is formal designation and documentation of the hedging relationship; (b) the hedge is expected to be highly effective; (c) the effectiveness of the hedge can be reasonably measured and (d) the hedge is highly effective relative to the hedged risk on a continuous basis throughout the hedging relationship.

BANCO DE CRÉDITO E INVERSIONES AND SUBSIDIARIES
NOTES TO THE INTERIM CONSOLIDATED FINANCIAL STATEMENTS
As of June 30, 2023 and December 31, 2022 and for the six and three-month periods ended June 30, 2023 and 2022

When a derivative hedge the exposure to changes in the fair value of an existing asset or liability, the latter is recognized at its fair value in relation to the specific hedged risk. The gain or loss from re-measuring the fair value, both hedged item and of the hedging derivative, are recognized in profit or loss for the period.

If the hedged item in a fair value hedge is a firm commitment, changes in the fair value of the commitment with respect to the hedged risk are recognized as an asset or liability with effect on profit or loss for the period. The gain or loss from re-measuring the hedging instrument at fair value are recognized in profit or loss the period. When an asset or liability is acquired as a result of the commitment, the initial recognition of the acquired asset or liability is adjusted to incorporate the cumulative change in the fair value measurement of the firm commitment that was recognized in the Interim Consolidated Statements of Financial Position.

When a derivative hedge the exposure to changes in the cash flows of existing assets or liabilities or expected transactions, the effective portion of the changes in fair value with respect to the hedged risk is recognized in equity. Any ineffective portion is recognized directly in profit or loss for the period.

The amounts recognized directly in equity are accounted for in profit or loss in the same periods in which hedged assets or liabilities affect profit or loss.

When a fair value hedge of interest rates is made for a portfolio and the hedged item is a currency amount rather than individual assets or liabilities, the gains or losses from the fair value measurement of both the hedged portfolio and of the hedging derivative, are recognized with effect to profit or loss for the period, but the measurement at fair value of the hedged portfolio is presented in the Interim Consolidated Statements of Financial Position under the captions "Other assets" or "Other liabilities", depending on the hedged portfolio position at a point in time.

m. Loans and receivables from customers (loans and advances)

Loans and receivables are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market and that the Bank does not intend to sell immediately or in the short term.

Loans and receivables are initially measured at fair value plus direct transaction costs and subsequently measured at amortized cost using the effective interest rate method. These include commercial and foreign trade loans, consumer, and mortgage loans, among others.

i. Lease agreements:

Receivables from lease agreements, included in the caption "Loans and receivables from customers", correspond to the periodic rental payments of agreements that meet the requirements to be classified as finance leases and are presented at their present value.

ii. Factoring operations:

The Bank, through its subsidiary BCI Factoring SA, performs operations with its customers, whereby it receives invoices and other commercial papers representing the credit with or without recourse to the transferor, paying the transferor a percentage of the total amount's receivable from the debtor for the transferred documents.

n. Provisions for credit loss of loans and contingent loans

The allowances required to cover the risk of credit losses have been established following the standards and instructions issued by the CMF.

Loans are recorded net of such allowances or showing the deduction. In the case of the provisions for contingent loans, they are presented as liabilities in the "Allowances" caption.

The Bank and its subsidiaries use models or methods, based on the individual and group analysis of the debtors, which were approved by the Board of Directors, to establish the loan allowances, indicated in the Compendium of Accounting Standards of the Financial Market Commission.

i. Allowances for individual assessment:

The individual assessment of debtors is necessary when dealing with clients that, due to their size, complexity, or exposure level, required to be known and analyzed in detail.

Naturally, the analysis of debtors should focus on their capacity and willingness to meet their credit obligations, through sufficient and reliable information, and must also analyze their credits in terms of guarantees, terms, interest rates, currency, adjustability, etc.

For establishing the allowance, debtors and their operations related to loans and receivables and contingent loans must be classified in the corresponding categories, with the prior assignment to one of the following three portfolio categories: normal, substandard, and non-performing.

BANCO DE CRÉDITO E INVERSIONES AND SUBSIDIARIES
NOTES TO THE INTERIM CONSOLIDATED FINANCIAL STATEMENTS
As of June 30, 2023 and December 31, 2022 and for the six and three-month periods ended June 30, 2023 and 2022

- Regular and substandard performance portfolios:

The regular performance portfolio includes those debtors whose payment ability allows them to meet their obligations and commitments, and according to the assessment of their economic-financial situation, it is not expected that this condition will change. The classifications assigned to this portfolio are categories A1 to A6.

The substandard portfolio will include debtors with financial difficulties or a significant deterioration of their ability to pay and on which reasonable doubt exists as to the repayment of principal and interest in the contractual terms agreed, showing low margins to meet their short-term financial obligations.

This portfolio also includes debtors, which recently have shown delinquency (payments overdue) in excess of thirty days. The classifications assigned to this portfolio are categories B1 to B4 of the rating scale.

As a result of the individual analysis of these debtors, they must be classified in the following categories; subsequently assigning them the probability of default and loss given default percentages that result in the subsequent loss percentage:

Type of portfolio	Debtor rating	Probability of default (PD) (%)	Loss given default (LGD) (%)	Expected loss (%)
Regular portfolio	A1	0.04	90.00	0.036000
	A2	0.10	82.50	0.082500
	A3	0.25	87.50	0.218750
	A4	2.00	87.50	1.750000
	A5	4.75	90.00	4.275000
	A6	10.00	90.00	9.000000
Substandard portfolio	B1	15.00	92.50	13.875000
	B2	22.00	92.50	20.350000
	B3	33.00	97.50	32.175000
	B4	45.00	97.50	43.875000

Provision on regular and substandard performance portfolios:

To determine the amount of the allowances that must be established for the regular and substandard performance portfolios, the exposure subject to provisions should first be estimated, to which the respective loss percentages (expressed in decimals) will comprise the probability of default (PD) and loss given default (LGD) established for the category within which the debtor and/or its qualified co-debtor is included, as applicable.

The exposure subject to provisions corresponds to loans plus contingent loans, less amounts that would be recovered by means of executing guarantees. Likewise, placement is understood as the carrying amount of the loans and receivables from the corresponding debtor, while for contingent loans, the value resulting from the application of the provisions stated in No. 3 of Chapter B-3 of the Compendium of Accounting Standards.

- Non-performing portfolio:

It includes debtors and their loans whose recovery is deemed to be remote, because their ability to pay is deteriorated or non-existent. Those debtors with clear indications of a possible bankruptcy are part of this portfolio, as well as those in which a forced restructuring of debts is necessary to avoid default and, in addition, any debtor whose repayment of principal and interest of a credit is overdue for a period equal or exceeding 90 days.

This portfolio comprises debtors from categories C1 to C6 of the classification scale established below and all loans, including 100% of the amount of contingent loans, held by those same debtors.

For purposes of establishing allowances on the non-performing portfolio, the use of allowance percentages that must be applied to the amount of the exposure is established, which corresponds to the sum of loans and contingent loans held by the same debtor. To apply this percentage, an expected loss rate must first be estimated, deducting from the amount of the exposure the amounts recoverable through the execution of the guarantees and, if there is specific background information that justifies it, also deducting the present value of the recoveries that can be obtained by exerting collection actions, net of the expenses associated with them. This loss rate must fall into one of the six categories defined according to the range of losses effectively expected by the Bank for all operations of the same debtor.

These categories, their range of loss as estimated by the Bank and the allowance percentages that should ultimately be applied on the amounts of the exposures, are indicated in the following table:

Type of portfolio	Risk Scale	Expected Loss Range	Allowance (%)
Non-performing portfolio	C1	Until 3 %	2
	C2	More than 3% up to 20%	10
	C3	More than 20% up to 30%	25
	C4	More than 30% up to 50%	40
	C5	More than 50% up to 80%	65
	C6	More than 80%	90

BANCO DE CRÉDITO E INVERSIONES AND SUBSIDIARIES
NOTES TO THE INTERIM CONSOLIDATED FINANCIAL STATEMENTS
As of June 30, 2023 and December 31, 2022 and for the six and three-month periods ended June 30, 2023 and 2022

ii. Allowances for group assessment:

The group assessment is aimed at group commercial loan portfolios classified in the model of group, consumer, and home mortgage allowances. For the determination of allowances of the group portfolio, groups of loans with homogeneous characteristics in terms of the type of debtor and agreed conditions are analyzed. In this way, allowances are established based on the expected losses derived from a certain probability of default (PD) and a percentage of severity of the loss, or loss given default (LGD), both parameters based on historical analysis and technically based estimates.

The amount of allowances to establish will be obtained by multiplying the total amount exposed in the respective group by the percentages of estimated default and loss given default.

a. Group commercial loans:

The Bank applies the standard model of allowances for commercial loans of the group portfolio, whether corresponds to commercial lease transactions, student loans or other types of commercial loans.

Commercial lease transactions

For these transactions, the allowance factor must be applied to the current value of the commercial lease transactions (including the purchase option) and will depend on the delinquency of each operation, the type of leased asset and the relationship, at the closing of each month, between the current value of each operation and the value of the leased asset (PVB), as indicated in the following tables:

Probability of Default (PD) applicable according to delinquency and type of asset (%)		
Past due days of the operation at the end of the month	Type of Good	
	Residential	Non residential
0	0.79	1.61
01-29	7.94	12.02
30-59	28.76	40.88
60-89	58.76	69.38
Non-performing portfolio	100.00	100.00

Loss Given Default (LGD) applicable according to PVB tranche and type of asset (%)		
PVB = Current value of the operation / Value of the leased asset		
PVB Section	Residential	Non residential
PVB <= 40 %	0.05	18.20
40% < PVB <= 50 %	0.05	57.00
50% < PVB <= 80 %	5.10	68.40
80% < PVB <= 90 %	23.20	75.10
PVB > 90 %	36.20	78.90

The determination of the PVB ratio will be made considering the appraisal value, expressed in UF for residential and in pesos for non-residential, recognized at the time they corresponding loan is granted, taking into account possible situations that at that time may be causing transitory increases in the prices of the good.

Student loans

For these transactions, the allowance factor must be applied on the student loan and the exposure of the contingent loan, when applicable. The determination of said factor depends on the type of student loan and the demand for payment of principal or interest, at the end of each month. When payment is due, the factor will also depend on its delinquency.

For loan classification purposes, a distinction is made between those granted to finance higher education in accordance with Law No. 20,027 (CAE) and, on the other hand, CORFO-guaranteed loans, or other student loans.

Probability of Default (PD) applicable according to payment enforceability, delinquency, and type of loan (%)			
Presents enforceability of the payment of principal or interest at the end of the month	Days past due at the end of the month	Type of Student Loan	
		CAE	CORFO or other
Yes	0	5.20	2.90
	01-29	37.20	15.00
	30-59	59.00	43.40
	60-89	72.80	71.90
	Portfolio in Default	100.00	100.00
No	n/a	41.60	16.50

Loss given the Default (LGD) applicable according to payment enforceability and type of loan		
Presents enforceability of the payment of principal or interest at the end of the month	Type of Student Loan	
	CAE	CORFO or other
Yes	70.90	
No	50.30	45.80

Generic commercial loans and factoring

For factoring transactions and other commercial loans, the allowance factor, applicable to the amount of the loan and to the exposure of the contingent loan, will depend on the delinquency of each operation and the relationship that exists, at the end of each month, between the obligations that the debtor has with the bank and the value of the real guarantees that protect them (PTVG), as indicated in the following tables:

Probability of Default (PD) applicable according to delinquency and PTVG (%) tranche			
Days past due at the end of the month	With guarantee		Without guarantee
	PTVG<=100%	PGTV>100%	
0	1.86	2.68	4.91
01-29	11.60	13.45	22.93
30-59	25.33	26.92	45.30
60-89	41.31	41.31	61.63
Non-performing portfolio	100.00	100.00	100.00

Loss Given Default (PDI) applicable according to PTVG (%) tranche			
(With/without) guarantees	PTVG	Generic commercial transactions or factoring without recourse of the transferor	Factoring with recourse of the transferor
With guarantee	PTVG <= 60%	5.00	3.20
	60% < PTVG <= 75%	20.30	12.80
	75% < PTVG <= 90%	32.20	20.30
	90% < PTVG	43.00	27.10
Without guarantees		56.90	35.90

The guarantees used for purposes of calculating the PTVG ratio of this method may be specific or general, including those that are simultaneously specific and general.

A guarantee may only be considered if, according to the respective hedge clauses, it was established in the first place in favor of the bank and only guarantees the debtor’s credits with respect to which it is debited (not shared with other debtors). The invoices assigned in the factoring transactions, or the guarantees associated with the residential loans of the mortgage portfolio, regardless of their coverage clauses, will not be considered in the calculation.

To calculate the PTVG ratio, the following should be considered:

- I. Transactions with specific guarantees: when the debtor granted specific guarantees, for generic commercial loans and factoring, the PTVG ratio is calculated independently for each guaranteed transaction, as the division between the amount of the loan and the contingent loan exposure and the value of the actual guarantee that covers.
- II. Transactions with general guarantees: when the debtor granted general or general and specific guarantees, the Bank calculates the corresponding PTVG, jointly for all generic commercial loans and factoring and not included in i) above, as the result of the sum of the amounts of the loans and exposures of contingent loans and the general, or general and specific guarantees that, according to the scope of the remaining hedge clauses, protect the credits considered in the numerator of the aforementioned ratio.

The amounts of the guarantees used in the PTVG ratio described above must be determined according to:

- The last valuation of the guarantee, whether appraisal or fair value, depending on the type of real guarantee in question.

To determine the fair value, the criteria indicated in Chapter 7-12 of the Updated Compendium of Standards must be considered.

- Eventual situations that could be generating transitory increases in the values of the guarantees.
- Limitations to the amount of hedge established in their respective clauses.
- Provisions for deductible amount related to FOGAPE Covid-19 guarantees

To determine the specific provisions of the loans guaranteed by the FOGAPE Covid-19 guarantee, the expected losses shall be determined by estimating the risk of each operation, without considering the substitution of the credit quality of the guarantor, according to the corresponding individual or group analysis method, in accordance with the provisions of Chapter B-1 of the Compendium of Accounting Standards.

The loan amounts associated with such operations that had been written off must be added to the aforementioned expected losses, in accordance with the provisions established in Chapter B-2 of the Compendium.

Therefore, the total amount of expected losses resulting from the aggregate calculation of each group of operations, including the amounts written off for that group as indicated in the preceding paragraph, shall be compared to the corresponding total amount of deductible amount, and perform the following:

- Expected losses less than the deductible amount

When the expected losses of the operations of a group to which the same deductible amount percentage applies, determined according to the procedure indicated above, are less than or equal to the aggregate amount of the deductible amount, the provisions will be determined without considering the FOGAPE Covid-19 coverage. 19, i.e., without substituting the credit quality of the direct debtor for that of the guarantor.

- Expected losses greater than the deductible amount

When the expected losses of the operations of a group to which the same deductible amount percentage applies, determined according to the procedure indicated above, are greater than the aggregate amount of the deductible amount, the provisions will be determined using the substitution method provided in 4.1 letter a) of Chapter B-1 of the Compendium of Accounting Standards.

For these purposes, the proportion to be replaced will be the one that corresponds to the limits indicated in article 13 of the Regulations for the Administration of the Guarantee Fund for Small and Medium-sized Entrepreneurs, applicable to the COVID-19 Guarantee Lines.

BANCO DE CRÉDITO E INVERSIONES AND SUBSIDIARIES
NOTES TO THE INTERIM CONSOLIDATED FINANCIAL STATEMENTS
As of June 30, 2023 and December 31, 2022 and for the six and three-month periods ended June 30, 2023 and 2022

Additionally, the ratio associated with the deductible amount resulting from multiplying the guaranteed amount of the corresponding group by the percentage of the applicable deductible amount shall be determined.

b. Consumer loans:

Group portfolio credit risk allowance model

According to chapter B-1 of the Compendium of Accounting Standards issued by the CMF, the credit risk allowance models are based on a look at expected losses, following "through the cycle" approach and not "at a point in time" approach.

These expected loss (EL) models are used to estimate future portfolio losses and are based on three fundamental components: Probability of Default (PD), Loss Given Default (LGD) and Exposure at Default (EAD). The final objective is to establish a sufficient level of allowances to cover future expected losses:

$$PE = Exposición * PI * PDI$$

The allowance models are organized according to segments, which are defined according to the types of debtors and the types of loans: Consumer, Commercial and mortgage. Reasonableness criteria prevail in this macro-segmentation, depending on how customers and products are managed from a commercial and risk point of view.

From these macro-segments, higher segmentation levels are generated to the extent that they improve the estimates of the parameters, and scores are given on these levels of segmentation to identify homogeneous groups of debtors, which allow better distribution of the risk in the customer portfolio.

Currently, the Bank makes an allowance using the maximum value between the result obtained by the standard matrix, the Compendium of Accounting Standards, chapter B-1, and the internal models.

c. Home mortgages:

The home mortgage loan portfolio includes loans that have the following characteristics: their destination is the financing of the acquisition, expansion, repair, or construction of a house. The debtor is the natural person who buys or owns the house, and the value of the mortgage guarantee covers all the loan.

The Bank uses the "Standard Method of Allowances for Mortgage Loans for Housing", which establishes the applicable allowance factors, represented by the expected loss on the amount of mortgage loans for housing, applied based on the delinquency of each loan and the ratio at the end of each month, between the amount of outstanding principal of each loan and the value of the mortgage guarantee (PVG) that covers it, as indicated in the following table:

Allowance factor applicable according to delinquency and PVG						
PVG Tranche	Concept	Days past due at the end of the month				Non-performing portfolio
		Current	01-29	30-59	60-89	
PVG≤ 40%	PD (%)	1.0916	21.3407	46.0536	75.1614	100.0000
	LGD (%)	0.0225	0.0441	0.0482	0.0482	0.0537
	EL (%)	0.0002	0.0094	0.0222	0.0362	0.0537
40%<PVG≤ 80%	PD (%)	1.9158	27.4332	52.0824	78.9511	100.0000
	LGD (%)	2.1955	2.8233	2.9192	2.9192	3.0413
	EL (%)	0.0421	0.7745	1.5204	2.3047	3.0413
80%<PVG≤ 90%	PD (%)	2.5150	27.9300	52.5800	79.6952	100.0000
	LGD (%)	21.5527	21.6600	21.9200	22.1331	22.2310
	EL (%)	0.5421	6.0496	11.5255	17.6390	22.2310
PVG>90%	PD (%)	2.7400	28.4300	53.0800	80.3677	100.0000
	LGD (%)	27.2000	29.0300	29.5900	30.1558	30.2436
	EL (%)	0.7453	8.2532	15.7064	24.2355	30.2436

Where:
PD = Probability of default
LGD = Loss given default
EL = Expected loss
LtV = Outstanding principal/Value of the mortgage guarantee

In the event that the same debtor maintains more than one home mortgage loan with the Bank and one of them is 90 days or more past due, all these loans will be assigned to the non-performing portfolio, calculating the allowances for each of them according to their respective percentages of PVG.

i. Loan write-off:

As a general rule, write-offs should be made when the contractual rights to the cash flows expire. In the case of loans, even if the foregoing does not occur, the corresponding asset balances will be written off in accordance with the provisions of title II of Chapter B-2 of the Compendium of Accounting Standards issued by the CMF.

The write-offs in question refer to the derecognition in the Interim Consolidated Statements of Financial Position of the asset corresponding to the respective transaction, including, therefore, that part that may not be due if it were a credit payable in installments or payments, or a lease transaction (No partial write-offs exist).

Write-offs are always accounted for with a debit to the provisions for credit loss established, in accordance with the provisions of Chapter B-1 of the Compendium of Accounting Standards, regardless of the reason for which the write-off is made. Subsequent payments obtained from written-off operations will be recognized in the Interim Consolidated Statements of Income for the Period as recoveries of written-off loans.

BANCO DE CRÉDITO E INVERSIONES AND SUBSIDIARIES
NOTES TO THE INTERIM CONSOLIDATED FINANCIAL STATEMENTS
As of June 30, 2023 and December 31, 2022 and for the six and three-month periods ended June 30, 2023 and 2022

The write-offs of loans and receivables are performed on overdue, past due and current installments, and the period must be considered from the beginning of their delinquency, that is, performed when the delinquency period of an installment or portion of loan transaction reaches the write-off term, as provided below:

Type of loan	Term
Consumer loans – secured and unsecured	6 months
Other transactions - unsecured	24 months
Commercial loans - secured	36 months
Residential mortgage loans	48 months
Consumer lease agreement	6 months
Other non-real estate lease transactions	12 months
Real estate lease agreement (commercial or residential)	36 months

The term corresponds to the time elapsed from the date on which the payment of all or part of the past due liability became due.

ii. Recovery of written-off loans:

Recoveries of written-off loans are recognized directly as revenue, as recoveries of written-off loans.

o. Fee income and expense

Fee income and expense are recognized in revenue according to the 5-step approach established by IFRS 15:

- Step 1: Identify the contract with the customer;
- Step 2: Identify the performance obligations in the contract;
- Step 3: Determine the transaction price;
- Step 4: Allocate the transaction price to the performance obligations of contracts;
- Step 5: Recognize revenue when (or as) the entity satisfies a performance obligation.

p. Impairment

For the assets in the caption "Loans and receivables from customers", the impaired portfolio is defined according to Chapter B-2 of the Compendium of Accounting Standards issued by the CMF as "loans from debtors for which there is evidence that they will comply with any of their obligations in the agreed payment conditions, regardless of the possibility of recovering the amount owed by resorting to guarantees, through the period of judicial collection actions or agreeing on different conditions”.

The policies on impairment measurement, assessed on a monthly basis, consider the following criteria:

i. Addition to impaired portfolio:

Transactions included by credit risk rating classified as substandard in categories B3 and B4, and the non-perform portfolio are recorded in individually classified transactions.

The rest of the transactions are classified in groups and are added when they are:

- Credit transactions that are past due for a period greater than or equal to 90 days.
- Renegotiated transactions.
- 100% of the transactions associated with the customer are carried over to the impaired portfolio.

Operations linked to residential mortgage loans or loans to finance higher education are not included in Law No. 20,027, which may be excluded as long as they do not present the conditions of non-compliance established in Circular No. 3.454 of December 10, 2008.

The behavior in the financial system is not considered to determine the addition to the impaired portfolio.

Removal conditions

- Individual case: for having improved their risk rating over the B3 category of the individual classification.
- Group case:
 - a) Non-renegotiated transactions: credit transactions included in impaired portfolio may return to the normal portfolio, only if the transaction in question meets the following conditions:
 - Register at least six consecutive payments of principal and interest, paying them at maturity or within the next 30 days.
 - That it is up to date with all its obligations and has no other credit transaction in an impaired portfolio.
 - In any case, it must not record any delinquency in the rest of the financial system for the last 90 days (last three years reported to the CMF at the date of consultation).
 - b) Renegotiated operations: may be removed from the impaired portfolio, only if the operation in question meets the following conditions:
 - Register at least six consecutive payments of principal and interest, paying them at maturity or within the next 30 days.

BANCO DE CRÉDITO E INVERSIONES AND SUBSIDIARIES
NOTES TO THE INTERIM CONSOLIDATED FINANCIAL STATEMENTS
As of June 30, 2023 and December 31, 2022 and for the six and three-month periods ended June 30, 2023 and 2022

- That it is up to date with all its obligations and has no other credit transaction in an impaired portfolio.
 - That it does not have another renegotiated transaction during the last nine months.
 - In any case, it must not record any delinquency in the rest of the financial system in the last 90 days (last three years reported in the CMF at the date of consultation).
- c) Renegotiated group portfolio from write-off: written-off commercial transactions that have been renegotiated, may be removed from the impaired portfolio, and added to the normal portfolio, only if the transaction in question meets the following conditions:
- Payment of 30% of the originally renegotiated transaction (total balance of the renegotiated transaction) or that first six payments have been made, agreed in the renegotiated commercial transaction.
 - Be up to date with the principal and interest payments.
 - Have no other transaction in the impaired portfolio.
 - Register no delinquency in the rest of the financial system in the last 90 days.

II. Non-financial assets:

The carrying amount of the Bank's non-financial assets, other than investment properties and deferred tax assets, is reviewed at each reporting date to determine whether there is any indication of impairment. If any such indications exist, then the asset's recoverable amount is estimated. In the case of goodwill and intangible assets that have indefinite useful lives or not yet available for use, the recoverable amounts are estimated at each presentation date.

In accordance with IAS 36 "Impairment of Assets", the entity shall assess at the end of each reporting period whether there is any indication of impairment of its intangible assets with indefinite useful lives, as well as of the goodwill acquired in a business combination. On the other hand, the Financial Market Commission (CMF) requires that "the valuations of goodwill and other non-amortizable intangible assets must be supported by two reports issued by professionals independent of the bank and its external auditors. Both reports support the initial value of intangible assets and valuations as of December 31 of each year.

An impairment loss in relation to goodwill is not reversed. In relation to other assets, impairment losses recognized in prior periods are assessed at each reporting period whether there is any indication that the loss may have decreased or disappeared. An impairment loss is reversed if there has been a change in the estimates used to determine the recoverable amount. An impairment loss is reversed only to the extent that the asset's carrying amount does not exceed the carrying amount that would have been determined, net of depreciation or amortization, had no impairment loss been recognized.

The Bank performs quarterly monitoring of the intangible assets and goodwill acquired in the business combination of its subsidiaries BCI Servicios Financieros and City National Bank in Chile and the United States, respectively. As of June 30, 2023, the Bank performed an impairment assessment of its assets, concluding that there are no impairments to be recorded on intangible assets and goodwill on such investments. As of December 31, 2022, the Bank determined that it was necessary to recognize an impairment loss associated with the Goodwill assigned to the Financial Services CGU for MCh\$20,442 (see further details in Note No. 15, letter b).

q. Interest and inflation-indexation income and expense

Interest and inflation-indexation income and expenses are recognized in the Interim Consolidated Statements of Income for the period based on the accrual principle using the effective interest method.

The effective interest rate is the discount rate that exactly matches the estimated cash flows receivable or payable over the expected life of the financial instrument (or, where appropriate, in a shorter period) with the net carrying amount of the financial asset or liability. To calculate the effective interest rate, the Bank determines the cash flows taking into account all the contractual conditions of the financial instrument. The calculation of said rate includes all commissions and other concepts paid or received that are part of it.

Transaction costs include incremental costs that are directly attributable to the acquisition or issue of a financial asset or financial liability.

However, in the case of past due loans and current loans with a high risk of irrecoverability, the prudent criterion of suspending the accrual of interest and inflation-indexation has been followed; and are recognized when received.

- Amount to be suspended:

The amount of income to be suspended on an accrual basis corresponds to that calculated between the date of suspension and the cut-off date of the Interim Consolidated Statements of Financial Position, which corresponds to the last day of the month.

- Suspension date:

The Bank will stop recognizing income on an accrual basis for the assets at amortized cost "Loans and advances to banks" and "Loans and receivables from customers" in the Statement of Income when the loan or one of its installments is 90 days past due.

The suspension of the recognition of income on an accrual basis implies that, from the date on which it must be suspended and until such loans are no longer in the impaired portfolio, the corresponding assets will not be increased with interest, inflation-indexation or fees in the Interim Consolidated Statements of Financial Situation and no income will be recognized for these concepts in the Interim Consolidated Statements of Income for the period, unless they are actually received. In this regard, income actually received from interest, inflation-indexation or fees shall be recognized as indicated in Chapter C-3 of the CNCB.

For the determination of the gross assets on which the provisions for credit loss are calculated according to chapter B1, suspended interest, adjustments and commissions will not be included.

r. Intangible assets

i) Software

The software acquired by the Bank is recognized at cost, less accumulated amortization, and accumulated impairment losses.

Disbursements or expenses for internally developed software are recognized as assets when the Bank can demonstrate its intent and ability to complete its development and use it internally to generate future economic benefits, and the cost of completing its development can be measured reliably. The capitalization of internally developed software expenses includes all direct costs attributable to the development of the software and is amortized over its useful life. Internally developed software is recognized at capitalized cost less accumulated amortization and accumulated impairment losses.

The subsequent expenses of the recognized asset are capitalized only when the future economic benefits of the specific assets in the related areas increase. All other expenses are recognized in the Interim Consolidated Statements of Income for the period.

Amortization is recognized on a straight-line basis in profit or loss considering the estimated useful life of the software from the date it is available for use, which is generally six years.

ii) Intangible assets acquired in business combinations

As a consequence of the purchase process of BCI Financial Group, INC. and Subsidiaries that was completed in October 2015, the merger between City National Bank of Florida and Total Bank completed on June 15, 2018, and the acquisition of the credit card business from Walmart (Financial Services) that was completed on June 4, December 2018, amortizable intangible assets with an indefinite useful life were recognized, which originated during the Purchase Price Allocation (PPA) process. The Bank permanently assesses its intangible assets for impairment. In this regard and, in accordance with the CMF regulations of the Compendium of Accounting Standards, Chapter A-2 number 7, two independent consultants of the Bank and different from the external auditors reviewed the basis of its valuation during the 2019 financial year.

According to IFRS 3 "Business Combinations", for the acquisition of Total Bank the values were definitively determined on December 31, 2018, which were adjusted within the term established by the standard.

According to IFRS 3 "Business Combinations", for the acquisition of BCI Servicios Financieros the values were definitively determined on December 4, 2019, which were adjusted within the term established by the standard.

Amortizable intangible assets recognized their portion of amortization on a straight-line basis according to the estimated useful life.

iii) Goodwill

The goodwill arising from a business combination will be allocated from the date of acquisition to each of the cash-generating unit (CGU) or group of CGUs of the acquirer, which are expected to benefit from the synergies of the business combination, regardless of whether other assets or liabilities of the acquiree are assigned to those units or groups of units.

Goodwill is tested annually for impairment, and when circumstances indicate that it is carrying amount may be impaired. Impairment losses in respect of goodwill is not reversed in future periods. Intangible assets, including goodwill, were subjected to impairment tests as indicated in IAS 36.

As of June 30, 2023, there are no significant changes between the carrying amount and the recoverable value of cash-generating units containing goodwill and intangible assets. As of December 31, 2022, the Bank's Management estimated the recoverable amount of its Financial Services CGU that present balances in intangible assets, resulting in the recognition of an impairment loss associated with the goodwill assigned to this CGU. For more information, refer to note 15, letter c).

s. Business combinations

Business acquisitions are accounted by applying the acquisition method. The consideration transferred in a business combination is measured at fair value, which is calculated as the sum of the acquisition date fair values of the assets transferred by the Company, the liabilities incurred by the acquirer to former owners of the acquiree, and the equity interests issued by the Company in exchange for control of the acquiree. Acquisition-related costs are recognized in profit or loss when incurred.

In a business acquisition, an independent specialist is used to determine the fair value of the net assets acquired and the identification of intangible assets is considered. For the valuation of these intangible assets identified in a business combination, cash flow projections are used based on the performance estimates of the acquiree.

At the acquisition date, the identifiable assets acquired, and liabilities assumed are recognized at fair value, except for the following:

- Deferred tax assets or liabilities, and assets or liabilities related to employee benefit agreements are recognized and measured in accordance with IAS 12 Income Taxes and IAS 19, respectively.
- liabilities or equity instruments related to share-based payment agreements of the acquiree, or share-based payment agreements of the company entered to replace the share-based payment agreements of the acquiree are measured in accordance with IFRS 2 at the date of acquisition; and
- the assets (or group of assets for disposal) that are classified as held for sale.

BANCO DE CRÉDITO E INVERSIONES AND SUBSIDIARIES
NOTES TO THE INTERIM CONSOLIDATED FINANCIAL STATEMENTS
As of June 30, 2023 and December 31, 2022 and for the six and three-month periods ended June 30, 2023 and 2022

Goodwill is measured as the excess of the sum of the consideration transferred, the amount of any non-controlling interest in the acquiree and the fair value of the equity interest previously held by the acquirer (if any) in the acquiree over the net amounts at the acquisition date of the identifiable assets acquired and liabilities assumed. If, after a reassessment, the acquisition-date net amounts of the identifiable assets acquired and liabilities assumed exceed the sum of the consideration transferred, the amount of any non-controlling interest in the acquiree, and the fair value of the interest previously owned by the acquirer in the acquiree (if any), such excess is immediately recognized in profit or loss as a gain from a bargain purchase.

Non-controlling interests that are present ownership interests and entitle their holders a share to a proportionate share of the entity's net assets in the event of liquidation may be measured initially, either at fair value or the proportionate share of non-controlling interests, of the recognized amounts of the acquiree’s identifiable net asset.

The choice of measurement basis is made on a transaction-by-transaction basis.

Remeasurement period adjustments are adjustments that arise from additional information obtained during the “measurement period” (which may not exceed one year from the acquisition date) about facts and circumstances that existed at the acquisition date.

t. Property and equipment

Items of property and equipment, excluding real estate, are measured at cost less accumulated depreciation and impairment losses.

The cost includes expenses that have been directly attributable to the acquisition of the asset and any other cost directly attributable to the process of bringing the asset to a working condition.

When part of an item of property and equipment has a different useful life, it is accounted for as a separate item (remodeling of real estate).

Depreciation is recognized in the Interim Consolidated Statements of Income for the Period based on the straight-line depreciation method over the useful lives of each part of an item of property and equipment. Leased assets are depreciated over the shorter of the lease period and their useful lives, unless it is certain that the Bank will obtain the property at the end of the lease period.

The estimated useful lives for the period as of June 30, 2023 and December 31, 2022, are as follows:

	June 30,	December 31,
	2023	2022
Buildings	50 years	50 years
Machinery and equipment	3 - 10 years	3 - 10 years
Facilities	7 - 10 years	7 - 10 years
Furniture and fixtures	7 years	7 years
Computing equipment	36 years	36 years
Real estate improvements	10 years	10 years
Other property, plant, and equipment	36 years	36 years

u. Assets received in lieu of payment

They are classified under the caption "non-current assets and disposal groups held for sale", they are recorded at the lower of their foreclosure cost or the net realizable value, less regulatory write-offs required by the CMF and are presented net of allowances. Write-offs are required if the asset is not sold within 18 months of receipt.

v. Personnel benefits

i. Vacation:

The annual vacation cost is recognized on an accrual basis.

ii. Short term benefits:

The Bank contemplates an annual incentive plan for its employees for meeting objectives, consisting of a certain number or portion of monthly remuneration and is provisioned based on the estimated amount to be distributed.

iii. Severance indemnity payments:

The Bank and its subsidiaries have not agreed with their staff to make severance indemnity payments to all events, except for the subsidiaries BCI Servicios Financieros y Administración de Créditos Comerciales SA and BCI Administradora de Tarjeta Servicios Financieros Limitada, which have defined benefit plans in a collective agreement with part of their employees. These plans correspond to contracts with severance indemnity payments to all events, whose obligation is recorded at its actuarial value.

These companies recognize a provision (see note 37) to reflect the obligation to pay severance indemnity to employees who are entitled to receive this benefit in any event. This provision has been calculated using an actuarial methodology that considers estimates of staff turnover, discount rate, salary increase rate and mortality. The liability for employee benefits is presented at present value using the projected unit credit method, in accordance with the provisions of "IAS 19 Employee Benefits". Actuarial gains or losses related to experience adjustments and changes in variables are recognized as Other Comprehensive Income and form part of the balance of Other Equity Reserves.

The cost of services for the current period is the increase in the present value of the defined benefit obligation, which occurs as a result of the services provided by employees in the current period.

BANCO DE CRÉDITO E INVERSIONES AND SUBSIDIARIES
NOTES TO THE INTERIM CONSOLIDATED FINANCIAL STATEMENTS
As of June 30, 2023 and December 31, 2022 and for the six and three-month periods ended June 30, 2023 and 2022

The financial cost is the increase produced during a period in the present value of the obligations for defined benefits, as a result of the fact that such benefits are a period closer to their expiration.

A present obligation exists when, and only when, the Entity has no realistic alternative but to make the corresponding payments.

The assumptions used are the following:

Detail	Source
Mortality	Mortality tables "RV-2014" established by the Financial Market Commission (CMF) were used.
Employee turnover	The historical turnover for executives in the collective agreement, voluntary resignation or company needs is 1.11%
Discount rate	The discount rate used to discount benefit payment flows for severance indemnity corresponded to a real annual rate of 1.92%. This rate corresponds to the 20-year BCU as of June 30, 2023. (Source: Central Bank).
Salary increases rate	The increase in salaries used for the projections, both for increase of the base salary and for total remuneration and corresponds to a real annual rate of 3.0%
Retirement	The retirement ages used to make the payment projections correspond to the minimum legal ages for retirement in Chile (DL.3500), ages that are generally used in the market, except when the reality of the company indicates otherwise. These ages correspond to 65 years for men and 60 years for women.

As of June 30, 2023, there are no experience adjustments or changes in the variants, accordingly, no adjustments were performed against other reserves. As of December 31, 2022, due to changes in the variants, the Bank performed an adjustment against other reserves for MCh\$132.

w. Leases

On the commencement date of a lease, the Bank recognizes a right-of-use asset and a lease liability in accordance with the provisions of IFRS 16.

i) Right-of-use assets

The Bank leases a number of office and branch premises, which are necessary to perform its activities. Contract terms are individually negotiated and comprise a wide range of terms and conditions.

Leases are recognized, measured, and disclosed in accordance with IFRS 16 “Leases”. This requires that a right-of-use asset and its corresponding liability be determined at the date the asset is available for use. Each lease payment is distributed between the liability and interest. The financial interest is charged to the financial margin during the period of the lease, as well as the right-of-use asset, which is depreciated on a straight-line basis over the term of the contract.

The lease term includes the non-cancellable period established in the lease agreements, and generally have an automatic renewal clause, which are not included in the calculation of the financial liability. Additionally, each of the parties can terminate the agreement early, prior notice. For both concepts, only the current contractual period has been considered to calculate the impact of this new regulation. For lease agreements with an indefinite useful life, the Bank has determined to assign a useful life equal to the longest non-cancellable period of its lease contracts.

The present value of the lease payments is determined using the discount rate that represents the Bank's incremental rate at the commencement of the contracts, based on the duration of each of them from the initial date of application.

At the initial measurement, the Bank measures the right-of-use asset at cost. The rent of the lease contracts is agreed in UF (inflation-adjusted unit) and paid in Chilean pesos. In accordance with the provisions of Circular No. 3,649 issued by the CMF, the monthly variation in UF that affects the contracts established in such monetary unit must be treated as a remeasurement, and therefore, the adjustments must be recognized as a modification to the obligation and at the same time the amount of the asset must be adjusted for the right of use assets.

Contracts whose non-cancellable period is equal to or less than 12 months are treated as short-term leases, and therefore the associated payments are recorded as a linear expense. Any modification in the terms or rental fee is treated as a remeasurement of the lease.

The Bank has not entered into lease agreements with residual value guarantee clauses or variable lease payments.

The Bank applies IAS 36 “Impairment of assets” to determine whether the right-of-use asset is impaired and to account for any identified impairment losses.

As of June 30, 2023 and December 31, 2022, the Bank has not identified impairment in the value of assets for the right of use assets.

ii) Lease liability

The Bank measures the lease liability at the present value of the lease payments that are not paid at that date. The lease payments are discounted using the interest rate implicit in the lease if that rate could be readily determined. If that rate cannot be readily determined, the Bank shall use the incremental borrowing rate. Lease payments included in the measurement of the lease liability comprise payments for the right to use the underlying asset during the lease term that are not paid at the measurement date, which include (a) fixed payments, less any lease incentives receivable; (b) variable lease payments that depend on an index or rate, initially measured using the index or rate at the commencement date; (c) amounts expected to be payable by the lessee under residual value guarantees; (d) the exercise price of a purchase option if the lessee is reasonably certain to exercise that option; and (e) payments for penalties for terminating the lease, if the lease term reflects the lessee exercising an option to terminate the lease.

BANCO DE CRÉDITO E INVERSIONES AND SUBSIDIARIES
NOTES TO THE INTERIM CONSOLIDATED FINANCIAL STATEMENTS
As of June 30, 2023 and December 31, 2022 and for the six and three-month periods ended June 30, 2023 and 2022

After the commencement date, the Bank measures the lease liability to recognize (a) interest on the lease liability; (b) lease payments made; and (c) remeasurements or modifications to the lease, and to reflect revised in-substance fixed lease payments.

The Bank remeasures the lease liability by discounting the revised lease payments, if, among others, (a) there is a change in the amounts expected to be payable under a residual value guarantee.

A lessee shall determine the lease payments to reflect the change in amounts expected to be payable under the residual value guarantee; (b) a change in future lease payments results from a change in an index or rate used to determine those payments.

The Bank remeasures the lease liability to reflect those revised lease payments only when there is a change in the cash flows. The Bank shall determine the revised lease payments for the remainder of the lease term based on the revised contractual payments.

As of January 1, 2019, the date of implementation of the standard, the Bank measured the lease liability at the present value of discounted lease payments using the lessee's incremental borrowing rate.

x. Statements of cash flows

For the preparation of the Consolidated Statements of Cash Flows, the indirect method has been used, in which, whereby taking profit or loss before tax for the period non-cash transactions are included, as well as income and expense associated with investing or financing cash flows.

For the preparation of the Consolidated Cash Flow Statements, the following terms are used:

- Cash flows: inflows and outflows of cash and cash equivalents, understood as short-term, highly liquid investments with insignificant risk of changes in value, such as: deposits in the Central Bank of Chile, deposits in domestic banks and foreign deposits.
- Operating activities: are the principal revenue-producing activities of banks and other activities that are not investing or financing activities.
- Investing activities: are the acquisition and disposal of long-term assets and other investments not included in cash and cash equivalents.
- Financing activities: are activities that result in changes in the size and composition of equity and liabilities that are not operating and investing activities.

y. Provisions and contingent liabilities

Provisions are liabilities of uncertain timing and amount. These provisions are recognized in the Consolidated Statements of Financial Position when the following requirements are met collectively:

- A liability is a present obligation arising from past events. At the date of the Interim Consolidated Financial Statements, it is likely that the Bank or its subsidiaries will have to use an outflow of economic benefits to settle the obligation and the amount of these outflows can be measured reliably.

A contingent asset or liability is any obligation arising from past events and whose existence will be confirmed only by the occurrence of one or more uncertain future events occur not wholly within the control of the Bank.

The provisions (which are measured considering the best information available on the outcome of the event that gave rise to them and are remeasured at each period-end) are used to meet the specific obligations for which they were originally recognized, proceeding to their reversal, totally or partially, when said obligations cease to exist or decrease.

Provisions are classified according to the obligations hedged, and are as follows:

- Provisions for employee benefit obligations
- Provision for lawsuits and litigation
- Provisions for obligations of customer loyalty programs
- Provisions for operational risk
- Other provisions for other contingencies

Provisions for country risk for operations with foreign debtors

The Bank makes provisions for country risk in accordance with chapter B-6 of the CNCB to hedge the risk that has been assumed by maintaining or committing resources in a foreign country. Said provisions must be made based on the country ratings made by the Bank in accordance with the provisions of RAN 7-13 on country risk and country ratings.

Provisions for credit loss for contingent loans

Contingent loans correspond to transactions or commitments in which the Bank assumes a credit risk by committing itself to third parties in the event of a future event, to make a payment or disbursement that must be recovered from its customers.

To calculate the provisions as indicated in Chapter B-1 of the CNCB, the amount of the exposure to be considered shall be equivalent to the percentage of the amounts of the contingent loans and which is established in Chapter B-3 of the CNCB, as indicated below:

Type of contingent exposure:	FCC
Freely available, immediate payment revolving credit facility	10%
Contingent loans linked to the CAE	15%
Letters of credit for goods movement operations	20%
Other freely available revolving credit facilities	40%
Debt purchase commitments in local currency abroad	50%
Transactions related to contingent events	50%
Co-debtor and guarantees	100%
Other credit commitments	100%
Other contingent loans	100%

Provisions for operational risk

The Bank constitutes provisions for operational risk in accordance with IAS 37 "Provisions, Contingent Liabilities and Contingent Assets", in which losses due to operational risk events are recognized, including external costs and eventual pending losses with a direct relationship to the operational risk event as established by Chapter 21-8 of the RAN.

i. Additional allowances:

The CMF has defined those additional allowances are those not derived from the application of the portfolio assessment models of each bank or to compensate for their deficiencies and must be to protect against the risk of unpredictable economic fluctuations.

The additional allowances are established to protect against the risk of macroeconomic fluctuations to anticipate situations of reversal of expansionary economic cycles that, in the future, could result in a worsening of the conditions of the economic environment and, in this way, function as an anti-cyclical mechanism of accumulation of additional allowances when the scenario is favorable and the use or allocation to specific allowances when conditions deteriorate.

The Bank has formal criteria and procedures for their use and establishment for the determination of additional allowances, which are approved by the Board of Directors.

As of June 30, 2023, allowances have been established for additional amounts of Ch\$409.865 million (Ch\$415,022 million as of December 31, 2022), which have been established to anticipate the potential deterioration of loan portfolios derived from the crisis caused by the Covid-19 pandemic.

These allowances are in accordance with the provisions of Number 10 of Chapter B-1 of the Compendium of Accounting Standards issued by the Financial Market Commission, which will be presented in liabilities in the caption "Special provisions for credit loss" (see note 26).

ii. Minimum allowances required for the normal individual portfolio:

The CMF has defined that the Bank must maintain a minimum allowance percentage of 0.50% on loans and contingent loans of the normal individual portfolio in accordance with the provisions of number 2.1.3 of Chapter B-1 of the Compendium of accounting Standards, which are presented in liabilities.

z. Use of estimates and judgments

In preparing these Interim Consolidated Financial Statements, the Bank’s Management has made judgements, estimates and assumptions that affect the application of accounting policies and the reported amounts of assets, liabilities, income, and expenses. Actual results may differ from these estimates, which Management periodically evaluates and monitors.

Estimates and underlying assumptions are reviewed by the Bank's Senior Management on an ongoing basis to quantify certain assets, liabilities, income, expenses, and uncertainties. Revisions to accounting estimates are recognized in the period in which the estimate is revised and in any future years affected.

Information about most significant areas of estimation of uncertainties and critical judgments made in applying accounting policies that have the most significant effects on the amounts recognized in the Consolidates Financial Statements is included in the following notes:

- Provisions for credit loss (notes 13 and 26)
- Impairment losses on certain assets (note 40)
- Valuation of financial instruments (notes 8,9, 10 and 11)
- Useful life of intangible assets and property and equipment (notes 15 and 16)
- Use of tax losses (note 18)
- Contingencies and commitments (note 29)
- Employee benefits (note 37)

aa. Income tax and deferred taxes

The determination of corporate income tax expense is made in accordance with IAS 12 and the Income Tax Law, whose legal rate is 27% for the general regime of art.14 letter A of the law, which both BCI and its subsidiaries in Chile follow.

The Bank recognizes, when appropriate, deferred tax assets and liabilities for the future estimates of the tax effects attributable to differences between the carrying amounts of assets and liabilities and their tax base.

Deferred tax assets/liabilities are measured, in accordance with current Chilean tax legislation, at the tax rates that are expected to be applied in the year in which the asset and/or liability are realized or settle. Future effects from changes in tax legislation or income tax rate are recognized in deferred tax starting from the date in which the law approving such changes is enacted or substantially enacted.

As of June 30, 2023 and December 31, 2022, the Bank has recognized net deferred tax assets and liabilities, as Management has assessed that it expects to obtain taxable profit in the future that allow using existing temporary differences at each period-end.

Deferred tax assets and liabilities are offset in the Statements of Financial Position, if there is a legally enforceable right to set off current tax assets against current tax liabilities, and only if these deferred taxes are related to income taxes corresponding to the same tax authority.

bb. Dividends on ordinary shares

Dividends on ordinary shares are recognized in equity in the year in which they were approved by the Bank's Shareholders' Meeting.

The Bank recognizes in liabilities the share of profits for the year that will be distributed in compliance with the Law on Corporations, which establishes that at least 30% of the net income for the year will be distributed as a dividend, or in accordance with its dividend policy.

cc. Earnings per share

Basic earnings per share is calculated by dividing the profit or loss that is attributable to ordinary shareholders of the Bank by the weighted-average number of outstanding shares during the period.

Diluted earnings per share is determined similarly to basic earnings, but the weighted average number of current shares is adjusted to take into account the potential dilutive effect of share options, warrants and convertible debt.

dd. Collection operations and Separate Equity performed by the subsidiary BCI Securitizadora SA

i) Collection operations:

Securitization companies can acquire assets on behalf of the separate equities that support the issuance of securitized bonds. These assets must have similar characteristics and each issue will form a separate equity.

These assets can be from future cash flows (a "business plan" or future cash flows to be obtained from a specific asset or group of assets or company are securitized) or from an existing asset (a portfolio of receivables, mortgage loans, etc.).

The above distinction is relevant on how the Bank's debt should be accounted for; in the first case of future cash flows, it must be accounted for in Separate Equity and to the originator, and in the case of existing assets only in Separate Equity.

These collection operations are part of the securitization process. In fact, the Securities Market Law itself, anticipating the practical difficulty that the formation of a Separate Equity means, includes the ability of acquiring the assets that form a separate equity even before the placement of the respective bonds.

Given there is a possibility that the respective Separate Equity will never be formed, or the securitized bond will not be placed for different reasons (legal, market, etc.), these operations contemplate a put option to resell the receivables back to the customer under certain circumstances (mainly if the securitized bond cannot prosper for the reasons stated above); this shall be recorded as a contingent obligation of the customer.

Standards approved and/or amended by the International Accounting Standards Board (IASB)

a. The following new standards and interpretations and/or amendments have been adopted in these financial statements:

New IFRS	Mandatory implementation date
IFRS 17, Insurance contracts	Annual periods beginning on or after January 1, 2023. This date includes the exemption of insurers from the application of IFRS 9 to allow them to implement IFRS 9 and IFRS 17 at the same time. Early adoption is permitted for entities applying IFRS 9 and IFRS 15 on or before that date.
Amendments to IFRS	
Accounting policy disclosures (Amendments to IAS 1 and Statement of Practice 2 Making Materiality-Related Judgments)	Annual periods beginning on or after January 1, 2023. Early adoption is allowed.
Definition of accounting estimate (IAS 8 amendments)	Annual periods beginning on or after January 1, 2023. Early adoption is permitted and will be applied prospectively to changes in accounting estimates and changes in accounting policies that occur on or after the beginning of the first annual reporting period in which the company applies the modifications.
Deferred tax on assets and liabilities arising from a single transaction (amendments to IAS 12)	Annual periods beginning on or after January 1, 2023. Early adoption is allowed.
Initial implementation of IFRS 17 and IFRS 9 – Comparative information (Amendments to IFRS 17)	The amendment is applicable from the application of IFRS 17 Insurance Contracts.

IFRS 17, Insurance contracts

Issued on May 18, 2017, this Standard requires that insurance liabilities be measured at a current performance value and provides a more uniform approach to presentation and measurement for all insurance contracts. These requirements are designed to generate consistent, principle-based accounting.

In March 2020, the International Accounting Standards Board (the Board) decided to defer the effective date of IFRS 17 to 1 January 2023, allowing early adoption if IFRS 9 and IFRS 15 have been adopted. The Board also decided to extend the temporary exemption to IFRS 9, granted to insurers that meet the specified criteria, until January 1, 2023.

The application of this new regulation had no impact on the Consolidated Interim Financial Statements, given that the companies in our consolidation radius do not issue insurance contracts.

Disclosures of accounting policies (Amendments to IAS 1 and Statement of Practice 2 Making Materiality Judgments)

In October 2018, the Council refined the definition of materiality to make it easier to understand and apply. This definition is aligned with the entire IFRS framework including the conceptual framework. The changes to the definition of materiality complement the non-mandatory Statement of Practice 2 Making Materiality-Related Judgments issued by the Board in 2017, which outlines a four-step procedure that can be used to assist in making materiality judgments in the preparation of financial statements.

In February 2021, the Board issued amendments to IAS 1 presentation of financial statements and an update to Practice Statement 2.

The modifications include the following:

- Requires companies to disclose their material accounting policies rather than meaningful accounting policies;
- Clarify that accounting policies relating to intangible transactions, other events or conditions are themselves immaterial and therefore do not need to be disclosed;
- Clarify that not all accounting policies that are related to material transactions, other events or conditions, are themselves material to the company's financial statements.

The amendments to Practice Statement 2 include two additional examples of the application of materiality in accounting policy disclosures.

The application of this amendment had no impact on the Consolidated Interim Financial Statements.

Definition of accounting estimate (IAS 8 amendments)

In February 2021, the Board issued amendments to IAS 8, Accounting Policies, Changes in Accounting Estimates and Errors, to clarify how companies should distinguish between changes in accounting policies and changes in accounting estimates, with the main focus on defining and clarifying accounting estimates.

The amendments clarify the relationship between policies and accounting estimates, specifying that a company develops an accounting estimate to achieve the objective previously defined in an accounting policy.

The implementation of this amendment had no significant impact on the Consolidated Interim Financial Statements.

Deferred tax relating to assets and liabilities arising from a single transaction (IAS 12 amendments)

In May 2021, the Board issued amendments to IAS 12 deferred tax related to assets and liabilities arising from a single transaction, to clarify how companies should account for deferred tax in certain types of transactions where an asset and a liability are recognized, such as leases and decommissioning obligations.

The amendments reduce the scope of the exemption in the initial recognition so that it does not apply to transactions that result in equal and countervailing temporary differences. As a result, companies will need to recognize a deferred tax asset and a deferred tax liability for temporary differences arising in the initial recognition of a lease and a retirement obligation.

The implementation of this amendment had no significant impact on the Consolidated Interim Financial Statements.

Initial implementation of IFRS 17 and IFRS 9 – Comparative information (Amendments to IFRS 17)

In December 2021, the Board issued amendments to IFRS 17 Initial Application of IFRS 17 and IFRS 9 – Comparative Information, with the aim of alleviating the operational complexities between accounting for insurance contract liabilities and related financial assets in the initial application of IFRS 17.

The amendments allow the presentation of comparative information of financial assets related to insurance contracts to be presented in a manner consistent with the provisions of International Financial Reporting Standard 9 (IFRS 9) Financial Instruments.

The application of this amendment had no impact on the Consolidated Interim Financial Statements, given that the companies in our consolidation radius do not issue insurance contracts.

b. The following new standards and interpretations have been issued but their implementation date is not yet in force:

Accounting pronouncements issued not yet in force

The following accounting statements issued are applicable to annual periods beginning after January 1, 2023, and have not been applied in the preparation of these consolidated interim financial statements. The Bank intends to adopt the accounting pronouncements that correspond to them on their respective dates of application and not in advance.

Amendments to IFRS	Mandatory implementation date
Classification of Liabilities as Current or Non-Current (Amendments to IAS 1)	Annual periods beginning on or after January 1, 2024. Early adoption is allowed
Sale or Contributions of Assets between an Investor and its Associate or Joint Venture (Amendments to IFRS 10 and IAS 28)	Effective date deferred indefinitely.
Liabilities for Leases in a Sale with Subsequent Lease (Amendments to IFRS 16)	Annual periods beginning on or after January 1, 2024. Early adoption is allowed.
Non-Current Liabilities with Covenants (Amendments to IAS 1)	Annual periods beginning on or after January 1, 2024.
Supplier Financing Agreements (Amendments to IAS 7 and IFRS 7)	Annual periods beginning on or after January 1, 2024.

Classification of Liabilities as Current or Non-Current (Amendment to IAS 1)

In order to promote uniformity of application and clarify the requirements for determining whether a liability is current or non-current, the International Accounting Standards Board has amended IAS 1, presentation of financial statements. As a result of this modification, banks must review their loan agreements to determine if their classification will change.

The amendments include the following:

- The right to defer cancellation must be substantiated: Current IAS 1 states that entities classify a liability as current when they do not have an unconditional right to defer cancellation of the liability for at least twelve months after the date of the reporting period. As part of its amendments, the IASB has removed the requirement that the right be unconditional and instead states that the right to defer cancellation must be substantiated and exist at the end of the reporting period.

- The classification of revolving credit lines may change: institutions classify a liability as non-current if they are entitled to defer its cancellation for at least twelve months from the end of the reporting period. Now, the IASB has clarified that the right to deferment exists only if the company meets the conditions specified in the loan agreement at the end of the reporting period, even if the lender does not verify compliance until a later date.
- Liabilities with equity cancellation characteristics: the amendments indicate that the cancellation of a liability includes the transfer of the entity's own equity instruments to the other party. The amendment clarifies how entities classify a liability that includes a conversion option of the other party, which could be recognized as equity or as a liability separately from the liability component in IAS 32 financial instruments: Presentation.

The amendment is effective, retroactively, for annual periods beginning on or after January 1, 2023. Early application is allowed. However, companies should consider including disclosures in accordance with IAS 8 Accounting Policies, Changes in Accounting Estimates and Errors in their subsequent annual financial statements.

Management has not determined the potential impact of the application of this amendment on its Consolidated Interim Financial Statements.

Sale or Contributions of Assets between an Investor and its Associate or Joint Venture (Amendments to IFRS 10 and IAS 28)

On September 11, 2014, this amendment was issued which requires that, when transfers of subsidiaries are made to an associate or joint venture, the entire gain is recognized when the transferred assets meet the definition of "business" under IFRS 3 Business Combinations. The amendment establishes a strong pressure in the definition of "business" for recognition in results. The amendment also introduces new and unexpected postings for transactions that consider partial maintenance on assets that are not businesses.

The effective date of application of this amendment has been postponed indefinitely.

The Bank's Management is waiting for the new term to evaluate the potential effects of this modification.

Leasing Liabilities on a Sale with Subsequent Lease (Amendments to IFRS 16)

In September 2022, the Board issued amendments to IFRS 16 Leases – Lease Liabilities in a Subsequent Lease Sale, which establishes the requirements for how an entity should account for a subsequent leaseback sale after the transaction date.

While IFRS 16 includes requirements on how to account for a sale with subsequent leaseback on the date the transaction takes place, the Standard does not specify what the subsequent measurement of this transaction would look like. The amendments issued by the Board are in addition to the requirements set out in IFRS 16 for sales with subsequent leaseback, and which support the consistent application of the Standard.

The Bank's Management considers that the application of these amendments does not have a significant effect on the Bank's Consolidated Interim Financial Statements.

Non-current liabilities with covenants (IAS 1 amendments)

The International Accounting Standards Board (the Board) issued in October 2022 the amendment to IAS 1 presentation of financial statements, in which it states that only covenants that an enterprise must comply with at or before the reporting date affect the classification of a liability as current or non-current.

The covenants that the enterprise must comply with after the filing date (i.e., future covenants) do not affect the classification of a liability on that date. However, where non-current liabilities are subject to covenants, companies will now be required to disclose information to help users understand the risk that those liabilities may become repayable within 12 months of the filing date.

The Bank's Management has not determined the potential impact of the application of this amendment on its Consolidated Interim Financial Statements.

Supplier Financing Agreements

The International Accounting Standards Board issued in May 2023 amendments to IAS 7 Statement of Cash Flows and IFRS 7 Financial Instruments: Disclosures, which establish additional disclosure requirements to be incorporated in the notes, in relation to the Supplier Financing Agreements, which will complement the requirements currently established by IFRS and will provide information that will allow the Users (investors) assess the effects of these arrangements on the institution's liabilities and cash flows, as well as the institution's exposure to liquidity risk.

It incorporates a requirement to disclose the type and effect of non-monetary changes in the carrying amounts of financial liabilities that are part of a supplier financing agreement.

The incorporated amendments apply to vendor financing agreements that have all of the following characteristics:

- The financing provider pays the amounts that a company (the buyer) owes to its suppliers.
- The company agrees to pay under the terms and conditions of the agreements on the same date or a later date than its suppliers are paid.
- The company has extended payment terms or suppliers benefit from advance payment terms, compared to the due date of the payment of the corresponding invoice.

No changes are incorporated with respect to the classification and presentation of liabilities and related cash flows and do not apply to financing agreements related to accounts receivable or inventories.

The Bank's Management has not determined the potential impact of the application of this amendment on its Consolidated Interim Financial Statements.

c. Sustainability regulatory pronouncements not yet in force

The following pronouncements issued are applicable for the preparation of sustainability reports. The Panel intends to adopt the pronouncements on their respective implementation dates and not in advance.

New Sustainability IFRS	Mandatory implementation date
IFRS S1 General Requirements for Sustainability Disclosures Related to Financial Reporting	Annual periods beginning on or after January 1, 2024. Early adoption is allowed with the joint implementation of IFRS S2.
IFRS S2 Climate-related disclosures	Annual periods beginning on or after January 1, 2024. Early adoption is permitted with the joint implementation of IFRS S1.

IFRS S1 General Requirements for Sustainability Disclosures Related to Financial Reporting

On 25 June 2023, the International Sustainability Standards Board (ISSB) issued the first Sustainability Standards. IFRS S1 sets out the general disclosure requirements for information on sustainability issues related to financial reporting that is useful to key users in decision-making.

This Standard requires an entity to disclose information on all relevant sustainability-related topics in the areas of governance, strategy, risk management, and metrics and objectives. Additionally, it establishes disclosure requirements about sustainability-related risks and opportunities that could affect short, medium- or long-term cash flows, access to financing, or cost of capital.

Its implementation date is effective, for annual periods beginning on, or after, January 1, 2024. Early adoption is permitted, with implementation in conjunction with IFRS S2 Climate-Related Disclosure.

The Bank's Management has not determined the potential impact of the application of this amendment on its Consolidated Interim Financial Statements.

IFRS S2 Climate-related disclosures

On 25 June 2023, the International Sustainability Standards Board (ISSB) issued the first Sustainability Standards. IFRS S2 sets out the information that an entity must disclose about its exposure to significant climate-related risks and opportunities, in order to:

- Users of general-purpose financial information can assess the effect of risks and opportunities on the business value of the entity.
- Understand how the entity's use of resources and the corresponding inputs, activities, outputs and outcomes support the entity's response and strategy to manage its significant climate change-related risks and opportunities.
- Assess the entity's ability to adapt its planning, business model and operations to the risks and opportunities identified.

Its implementation date is effective, for annual periods beginning on, or after, January 1, 2024. Its early adoption is allowed, with the application in conjunction with IFRS S1 General Requirements for Sustainability Disclosure related to Financial Reporting.

The Bank's Management has not determined the potential impact of the application of this amendment on its Consolidated Interim Financial Statements.

d. Standards and instructions issued by the CMF

Circular No. 2,330: On January 13, 2023, the Financial Market Commission incorporated a new Chapter 21-14 to the Updated Compilation of Rules for Banks, which contains the provisions related to the development of the Internal Liquidity Adequacy Assessment Process (ILAAP) and the general requirements and conditions considered by the Commission for the assessment of the adequacy of the liquidity position of banks.

The Bank's Management believes that the application of this standard will have no effect on the Bank's Consolidated Interim Financial Statements.

Circular No. 2,331: On February 7, 2023, the Commission has decided to incorporate and/or update its information systems to require the audited institutions the necessary information to evaluate the operation of the FOGAPE Chile Apoya program, developed within the framework of the provisions of Law No. 21,514 and Supreme Decree No. 435 of the Ministry of Finance. Accordingly, the institutions should prepare the following periodic information files:

BANCO DE CRÉDITO E INVERSIONES AND SUBSIDIARIES
NOTES TO THE INTERIM CONSOLIDATED FINANCIAL STATEMENTS
As of June 30, 2023 and December 31, 2022 and for the six and three-month periods ended June 30, 2023 and 2022

1. File C50 on operations associated with special FOGAPE guarantee programs. This is a modification to the current C50 file, which reports on a monthly basis the transactions subject to provisions for credit risk that have a FOGAPE COVID-19 and FOGAPE Reactivation guarantee, adding a code in field 16 to identify the transactions that have a FOGAPE Chile Apoya guarantee.
2. New D61 file on daily interest rates of operations guaranteed by FOGAPE Chile Apoya.
3. New E25 file on the detail of financing requests under the FOGAPE Chile Apoya program.

The Bank's Management believes that the application of this standard will have no effect on the Bank's Consolidated Interim Financial Statements.

Circular No. 2,333: On May 13, 2023, the CMF modified chapters 18-5 on debtor information of financial institutions. In order to improve the completeness of the information required from banks, banking support companies, credit card issuers and supervised credit unions, within the framework of the provisions of Article 14 of the General Banking Law, the Commission has deemed it appropriate to require them to continue reporting those transactions that, having been originated by them, are later assigned or sold to securitization companies or securitized credit funds, to the extent that the referred supervised institutions maintain the administration of such transactions.

Accordingly, it is necessary to incorporate new codes in field 4 of file D10 and D27, which will allow this Commission to distinguish the operations assigned or sold, as well as the fields that identify them in files R04 and R05.
The Bank's Management considers that the application of this standard will not have any effect on the Bank's Consolidated Financial Statements.

Circular No. 2336: on June 20, 2023, the Commission considered it appropriate to repeal the RAN Chapter 12-21 rules on measurement and control of interest rate risk in the banking book and readjustment, since its provisions became ineffective as of April 2023, as established by Circular No. 2,312.

The Bank's Management believes that the application of this standard will have no effect on the Bank's Consolidated Interim Financial Statements.

NOTE 4 – ACCOUNTING CHANGES

As of the date of these Consolidated Interim Financial Statements, there are no accounting changes to disclose.

NOTE 5 – SIGNIFICANT EVENTS

a) Agreement for the distribution of profits for the year 2022

On March 14, 2023, a Board of Directors meeting was held, where it was agreed to determine the distribution of the net profits obtained by the Bank in 2022, which was approved at the Ordinary Shareholders' Meeting held on April 4, 2023.

The approved subjects are the following:

Distribute the balance of net profits amounting to Ch\$820,821,690,521 (MCh\$820,822), as follows:

- Distribute a dividend of Ch\$1,500 per share among the total of 168,837,345 shares issued and registered in the Shareholders' Registry, which implies allocating for this purpose the sum of Ch\$253,256,017,500 (MCh\$253,256), i.e., 30.85% of the distributable net income for the year 2022; and
- Allocate the remaining balance of profits for the year to the reserve fund from profit, i.e., the sum of Ch\$567,565,673,021 (MCh\$567,566).

At the Extraordinary Shareholders' Meeting held on April 4, 2023, the following was approved:

- Capitalize reserves from profit of Ch\$540,925,430,023 (MCh\$540,925) as follows:
 - The amount of Ch\$540,925,422,275 (MCh\$540,925), through the issuance of 21,700,678 paid-in shares without par value.
 - The amount of Ch\$7,748, without the issuance of shares, through the capitalization of reserve funds from profits.

b) Issue and placement of bonds

During the period 2023, no subordinated bond issues or placements have been.made.

During the period 2023, the following issue of Current Bonds in pesos was made:

Series	Placement date	Nominal	Internal Return Rate (TIR) (%)	Due date
BBCIT40223	02-24-2023	35,000,000,000.00	6.800	02-01-2029

During the period 2023, there have been no issues or placements of current Bonds in UF.

During the period 2023, there have been no issues or placements of current Bonds in Japanese Yen.

During the period 2023, there have been no issues or placements of Current Bonds in Australian Dollars.

During the period 2023, there have been no issues or placements of Current Bonds in Euros.

During the period 2023, there have been no issues or placements of Current Bonds in American Dollars.

During the period 2023, the following issuance and placement of current Bond in Swiss Francs was performed.

Series	Date of issue	CHF	Internal Return Rate (TIR) (%)	Due date
CH1248666963	03-22-2023	135,000,000	2.8925	03-22-2028

c) Collective Voluntary Proceeding between the National Consumer Service and the Bank.

In a voluntary proceeding N° V-359-2022, processed at the 9th Civil Court of Santiago, by resolution dated November 25, 2022, after verifying compliance with the minimum requirements, the agreement entered between the National Consumer Service and the Bank, which is contained in Exempt Resolution No. 895 dated October 14, 2022, was legally approved, for the agreement to take effect for the customers that may potentially be affected.

The Bank decided to reach an agreement with Sernac and participate in a Collective Voluntary Procedure (PVC), which implies refunding charges made for the collection of legal fees to customers recording past due balances. The amounts to be refunded relate to legal expenses incurred by the Bank between July 1, 2020, and June 30, 2022, in cases where customers did not comply with the obligations agreed-upon. The amount to be refunded is MCh\$7,287.

This situation was generated as a result of a difference in the interpretation of the administrative regulation on the collection of legal commissions between Sernac and the Bank. This decision made by the Bank for a conciliation is based on the understanding that we have always acted in good faith and seek all possible options to reach an agreement with our customers, as, if a person has problems to catch up financially, the Bank analyzes the case to provide payment facilities, such as extensions, new terms and partial payment reductions that allow them to regularize their situation.

As of the date of issuance of these Interim Consolidated Financial Statements, refunds to customers have been made in full as established in the agreement between Sernac and the Bank.

d) Capital increase BCI Peru

On April 13, 2023, the shareholders of Banco BCI Peru agreed to a capital increase of which the Bank has contributed the amount of MCh\$41,610.

NOTE 6 – BUSINESS SEGMENTS

Pursuant to IFRS 8, the Bank has aggregated operating segments with similar economic characteristics based on the aggregation criteria indicated in the standard. Thus, a business segment comprises customers to whom a differentiated product offering is addressed, but who are homogeneous in terms that their performance is measured in a similar way and are therefore part of the same business segment. In general terms, such aggregation has no significant impact on understanding the nature and effects of the business activities in which the Bank engages and the economic environment in which it operates.

The segment report is presented by the Bank based on the defined business structure, which is aimed at optimizing customer service with products and services, according to their relevant commercial characteristics.

To reliably reflect the nature of the Bank's business in the segments in which it engages, the presentation of the note includes the following:

The result of the Balance Sheet management is assigned to the commercial segments according to the composition of assets and liabilities of each business.

Corporate expenses are assigned to commercial segments, based on assignment criteria for each of the units established as Corporate (Comptrollership, Accounting, General Management, among others).

A minimum provision adjustment is assigned to the segments according to the classification of the customers that originated them.

Voluntary (additional) provisions expense is allocated to the Commercial Segments: Consumer and Housing 100% to Individuals and Commercial based on the weight of the Commercial provisions stock of SMEs and Wholesale in the related period.

In June 2021, Private Banking was integrated into Investment & Finance Banking to deepen our business model and enhance investment opportunities. In this way, Private Banking was transferred from the Wholesale segment to the Finance segment.

The commercial structure is presented below, with the segments defined by the Bank:

Retail Banking Segment: serves natural persons. Its business units are: Personal and Premium.

SME Banking segment: this segment includes companies with sales of up to UF 80,000 per year.

Wholesale Banking segment: considers all companies with sales of more than UF 80,000 per year.

Finance segment: includes the intermediation of financial positions and the management of the Bank's own investment portfolio. It also considers high-net-worth clients and investors that require high-value financial services (Private Banking).

BCI Financial Group: corresponds to business and operations performed in the United States through City National Bank of Florida (CNB), which operates as an independent unit, under the supervision of senior management in Chile.

Financial Services: corresponds to businesses associated with the issuance and operation of BCI Líder Mastercard and Presto credit cards, the origination of low and high-amount cash advances and personal insurance brokerage, among others, which operates as an independent unit, under the supervision of BCI's senior management.

Other: this concept includes expenses and/or income, which due to their nature are not directly identified with the business segments and therefore are not assigned.

Allocation of results of subsidiaries by customer:

Consistent with its customer-focused strategy, management of the segments considers in each one the income and expenses generated in the subsidiaries as a result of the attention/provision of services to the Bank's customers in each segment, as well as the distribution desk results.

Allocation of balance sheet management result:

To consider in each segment all, the benefits and costs associated with serving its customers, the result for managing currency and term mismatches is distributed to the segments, in proportion to the assets and liabilities of each segment.

Allocation of expenses to commercial segments:

Own expenses: correspond to the expenses of the commercial units that are divided into direct business expenses (personnel expenses, customer service, extra expenses, materials, and supplies, among others) and intercommercial expenses, which are assigned to the business by survey or ABC (transactions).

Assigned expenses: expenses of support units (Operations, Risk, Management, etc.) that are assigned based on surveys (according to the services they provide to the business) or ABC (transactions).

Technological expenses: correspond to technological expenses, whether depreciation, recurring expenses (software, licenses, maintenance, etc.) and expenses for new projects, which are grouped into the different technological applications of the Bank, which have a defined allocation driver for the banks based on their use (ABC model).

These criteria have been applied for the periods ended June 30, 2023, and 2022.

BANCO DE CRÉDITO E INVERSIONES AND SUBSIDIARIES
NOTES TO THE INTERIM CONSOLIDATED FINANCIAL STATEMENTS
As of June 30, 2023 and December 31, 2022 and for the six and three-month periods ended June 30, 2023 and 2022

The management of the commercial areas indicated above is measured with the concepts presented in this note, which is based on the accounting principles applied to the Bank's Interim Consolidated Statements of Income for the Period.

b) Types of derivatives

The Bank uses accounting hedges to manage the fair value and cash flow risk to which it is exposed.

i) Fair value hedges:

Fair value hedges for both foreign currency and local currency positions cover the fair value of the position against changes in the base rate, without considering the implicit credit spread. These operations reduce the risk of changes associated with fluctuations in their fair value as a result of changes in interest rate structures, among others.

Considering the different items in the balance sheet as derivatives that comply with the function of hedging such risks, either by Cash Flow or Fair Value Hedges, the objective of these tables is to show the management of risk hedges in P&L, as their presented values exclude adjustments and interest accrual.

A detailed summary of the hedging items and instruments used in value hedges as of June 30, 2023 and December 31, 2022 in notional amounts is presented below:

BANCO DE CRÉDITO E INVERSIONES AND SUBSIDIARIES
NOTES TO THE INTERIM CONSOLIDATED FINANCIAL STATEMENTS
As of June 30, 2023 and December 31, 2022 and for the six and three month-periods ended June 30, 2023 and 2022

The guarantees provided to the Bank to guarantee the payment of the rights reflected in its loan’s portfolio correspond to mortgages, pledges, including warrants and trade and commercial financial instruments.

The Bank finances the acquisition of goods to its customers, both movable and real estate, through finance lease agreements between 1 and 10 years depending on each contract, which are presented in the caption lease operations. As of June 30, 2023 and December 31, 2022, approximately MCh\$666,691 and MCh\$609,754, respectively, correspond to finance leases on personal property, and MCh\$953,746 and MCh\$774,021, respectively, to finance leases on real estate.

The detail of the reconciliation between the gross investment and the present value of the minimum collections as of June 30, 2023 and December 31, 2022, is as follows:

	Net balance receivable	
	As of June 30, 2023	As of December 31, 2022
	MCh\$	MCh\$
Gross finance lease	1,854,448	1,747,359
Unaccrued finance income	(234,011)	(183,181)
Net finance lease	1,620,437	1,564,178

As of June 30, 2023 and December 31, 2022, the cash flows receivable by the Bank from finance lease agreements due to expiration are as follows:

	Net balance receivable	
	As of June 30, 2023	As of December 31, 2022
	MCh\$	MCh\$
On-demand	-	-
Up to a month	212,935	34,739
More than 1 month to 3 months	205,127	109,577
More than 3e months to 1 year	337,263	348,672
More than 1 year to 3 years	341,881	540,317
More than 3 years to 5 years	215,834	235,275
More than 5 years	307,397	295,598
Total	1,620,437	1,564,178

There is no evidence of impairment for finance lease agreements entered into by the Bank.

The Bank has acquired financial assets corresponding to real estate for a value of Ch\$7,031 million for the period 2023 and Ch\$8,913 million for the period 2022, through the execution of guarantees or dations in payment of collateral.

c) Impairment

The Bank assesses, at the end of each reporting period, whether there is any indication of impairment in the value of any amortizable and non- amortizable assets. If such indication exists, or when an impairment testing is required, the Bank estimates the recoverable amount of the asset.

As of June 30, 2023, the Bank performed an impairment assessment of the value of its assets, concluding that there are no impairments to be recorded on intangible assets and goodwill on such investments. As of December 31, 2022, the Bank recorded two impacts related to impairment of intangible assets, the first impairment related to obsolescence of internally generated software of MCh\$567 and the second impairment related to the Financial Services CGU. The Bank's Management estimated the recoverable amount of its Financial Services CGU that records balances in intangible assets, resulting in the recognition of an impairment loss associated to the goodwill assigned to this CGU of MCh\$20,442.

BANCO DE CRÉDITO E INVERSIONES AND SUBSIDIARIES
NOTES TO THE INTERIM CONSOLIDATED FINANCIAL STATEMENTS
As of June 30, 2023 and December 31, 2022 and for the six and three month-periods ended June 30, 2023 and 2022

	December 31, 2022			
	Chile	United States	Peru	Total
	MCh\$	MCh\$	MCh\$	MCh\$
Current tax asset	137,908	-	158	138,066
Current tax liability	(1,132)	(16,361)	-	(17,493)
Net total	136,776	(16,361)	158	120,573

b. Income tax

The effect of tax expenditure for the periods ended as of June 30, 2023 and 2022, is comprised of the following:

	June 30, 2023	June 30, 2022
	MCh\$	MCh\$
Income tax expense:		
Current year tax	(107,861)	(26,225)
Surplus/deficit in previous year provision	-	(5,996)
Deferred tax credit (debit):		
Origination and reversal of temporary differences	68,426	(24,102)
Subtotal	(39,435)	(56,323)
Tax for non-deductible expenses under Article 21	(114)	(93)
Capital gains tax Law 21,420 (10%)	105	-
Net income tax debit (credit) to profit or loss	(39,444)	(56,416)

c. Effective Tax Rate Reconciliation

The following is the reconciliation between the income tax rate and the effective rate applied in determining the tax expense as of June 30, 2022 and 2022:

	As of June 30,			
	2023		2022	
	Tax rate	Amount	Tax rate	Amount
	%	MCh\$	%	MCh\$
Profit before tax		412,289		497,344
Tax at the prevailing tax rate	27.00%	111,318	27.00%	134,283
Tax effect of non-deductible expenses when calculating taxable income:				
Currency correction BCI Financial Group (1)	(4.06%)	(16,735)	(0.39%)	(1,921)
U.S. and Peru rate differences (2)	(0.82%)	(3,384)	0.60%	2,969
Equity price-level restatement (3)	(11.48%)	(47,312)	(19.26%)	(95,791)
MIAMI Branch Tax Credit	(0.64%)	(2,653)	0.00%	-
Bonds 104 LIR (4)	(0.34%)	(1,403)	1.51%	7,520
Single tax art, 107° LIR	(0.79%)	(3,268)	(0.27%)	(1,326)
Readjustment art 72° LIR	0.00%	13	1.19%	5,911
Others	0.70%	2,868	0.96%	4,771
Effective rate and income tax expense	9.57%	39,444	11.34%	56,416

- (1) The investment that BCI maintains in the US (BCI Financial Group) for tax purposes in Chile is adjusted for changes in the exchange rate (US dollar), which is subject to the Corporate Income Tax. The impact of such adjustment as of June 30, 2023 is a tax expense of Ch\$16,735 million, while as of December 31, 2022, this effect corresponded to tax expense of Ch\$1,921 million.
- (2) The legal tax rate in Chile is 27%, while in the US the tax rate is 25.345% (federal tax of 21% and state tax of 5.5%). Therefore, with respect to part of BCI’s consolidated profit (CNB, Miami Branch and BCI Securities) there is a tax saving associated with the difference in tax rates in force at different jurisdictions.
- (3) The Chilean Income Tax Law establishes the obligation to make an adjustment for monetary correction of the tax equity of First Category income taxpayers, which translates into a tax rebate that varies according to the CPI. In these terms, the lower tax savings of the item is due to the lower variation of the CPI of the current year in relation to the previous period. This year a VIPC of +2.6% is registered, while last year it amounted to +6.9%.
- (4) Corresponds to government bonds under article 104 of the Income Tax Law (LIR) registered in the Bank's trading portfolio, which belong to the Non-Income Income regime.

d. Effect of deferred taxes in equity

The deferred tax that has been recognized as a debit to equity as of June 30, 2023 and December 31, 2022, is comprised of the following:

	Accumulated Amounts		Effect on Profit and Loos	
	June 30, 2023	December 31, 2022	June 30, 2023	December 31, 2022
	MCh\$	MCh\$	MCh\$	MCh\$
Financial investments available for sale	10,683	18,413	(7,730)	7,572
Investments for Cash Flow Hedge	(48,060)	(38,045)	(10,015)	9,755
Other deferred tax credit (debit) on equity	135,547	136,933	(1,386)	136,933
Deferred tax credit (debit on equity)	98,170	117,301	(19,131)	154,260

e. Deferred tax effect

As of June 30, 2023 and December 31, 2022, the Bank has recorded the effects of deferred taxes in accordance with IAS 12 in its Interim Consolidated Financial Statements.

	June 30	December 31,
	2023	2022
	MCh\$	MCh\$
Deferred tax assets:		
With effect in income	410,804	600,015
With effect in equity	98,170	(117,301)
Total deferred tax assets	508,974	482,714
Deferred tax liabilities:		
With effect in profit or loss	(2,208)	(1,612)
With effect in Shareholders' equity	-	-
Total deferred tax liabilities	(2,208)	(1,612)
Total net deferred tax assets:	506,766	481,102

BANCO DE CRÉDITO E INVERSIONES AND SUBSIDIARIES

c) Dividends

During the periods ended June 30, 2023 and December 31, 2022, the following dividends were declared by the Bank:

	June 30,	December 31,
	2023	2022
Ch\$ per common share	Ch\$1,500	Ch\$1,010

The provision for minimum dividend as of June 30, 2023 MCh\$111,833 (MCh\$246,247 as of December 31, 2022).

d) As of June 30, 2023 and December 31, 2022, there are no dilutive securities, such that basic and diluted earnings per share are the same:

	June 30,	December 31,
	2023	2022
Earnings attributable to equity holders of the parent	372,775	820,822
Profit available to shareholders in MCh\$	372,775	820,822
Weighted average number of shares	168,837,345	144,922,480
Basic earnings per share (\$/share)	2,208	5,664

Items that can be classified in profit or loss

- Foreign currency translation differences of foreign entities:

They arise from exchange differences arising from the translation of a net investment in foreign entities whose functional currency is different from the parent company's functional currency.

- Cash flow hedge:

They arise from the valuation at fair value at the end of each period of the derivative contracts that have been defined as cash flow hedges.

- Changes in the fair value of financial assets at fair value through other comprehensive income

The fair value reserve includes the accumulated net changes in the market value of financial assets at fair value through other comprehensive income. When (all or part of) the investment is sold or disposed of, these reserves are recognized in the Interim Consolidated Statements of Income for the Period as part of the gain or loss related to investments (Note 1 (t) states the accounting treatment in case of impairment).

Items that will not subsequently be reclassified to profit or loss

Net changes in the fair value of equity instruments designated at fair value through other comprehensive income:

They relate to equity instruments (shares) for minority investments in companies recorded in accordance with IFRS 9, under which changes in the fair value of such instruments shall irrevocably be recorded in other comprehensive income after initial recognition.

NOTE 29 – CONTINGENCIES AND COMMITMENTS

- a) Lawsuits and legal proceedings

Banco BCI

The Bank and its subsidiaries record several lawsuits related to their activities which, considering their background and grounds for the defensive arguments presented, in the opinion of Management and the internal legal advisors, will not generate liabilities or obligations in addition to those previously recorded by the Bank and its subsidiaries. Therefore, it has not been considered necessary to record a provision in addition to the one recorded for these contingencies. As of June 30, 2023, the Bank and its subsidiaries had provisions for civil, labor, and other claims amounting to MCh\$1.298 (MCh\$715 as of December 31, 2022).

- b) Guarantees granted for operations:

- Direct commitments

As of June 30, 2023 and December 31, 2022, the Bank does not maintain guarantees for this concept.

- Guarantees for operations

BCI Corredor de Bolsa S.A.

As of June 30, 2023, this Company has collateralized the commitments for simultaneous operations in the Santiago Stock Exchange, whose valuation amounts to MCh\$55,003 (MCh\$61,006 as of December 31, 2022).

As of June 30, 2023, the Company has provided guarantees for the correct fulfillment of the settlement of CCLV system operations in the Santiago Stock Exchange for MCh\$12,391 (MCh\$7,763 as of December 31, 2022).

As of June 30, 2023, the Company has provided guarantees for the correct fulfillment in the settlement of CCLV system operations with derivatives in the Santiago Stock Exchange MCh\$178 (MCh\$495 as of December 31, 2022).

As of June 30, 2023, the Company maintains guarantees abroad for international market operations for MCh\$40 (MCh\$42 as of December 31, 2022).

The Company does not have any guaranteed bonds.

The Company has a guarantee amounting to UF20,000 to comply with the provisions of Article 30 of Law 18.045, which aims to ensure the correct and full compliance with all its obligations as a securities broker and whose beneficiaries are the present or future creditors that it has or may have as a result of its brokerage operations. This guarantee corresponds to a policy contracted on August 19, 2022 (N°330-22-00033372) valid until August 19, 2023, with Compañía de Seguros de Mapfre Garantía y Crédito, being the Santiago Stock Exchange (Bolsa de Comercio de Santiago, Bolsa de Valores) the representative of the possible beneficiary creditors.

The Company maintains a guarantee amounting to UF10,000 to comply with the provisions of Article No. 12 and following and 99 and following of Law No. 20.712, which guarantees the faithful compliance with the obligations of BCI Corredor de Bolsa for the management of third-party funds and portfolio. This guarantee is effective from November 7, 2022 to November 7, 2023.

Employee fidelity insurance or employee loyalty insurance

BCI Corredor de Bolsa S.A. has an insurance policy taken out with Southbridge Compañía de Seguros Generales S.A., which covers Banco Crédito e Inversiones and its subsidiaries from May 31, 2022, to November 30, 2023, for an amount of UF500,000.

BCI Corredores de Seguros S.A.

As of June 30, 2023, the Company has contracted the following insurance policies to comply with the provisions of letter d) of Article No. 58 of Decree with Force of Law No. 251 of 1931, to guarantee the correct and full compliance with all the obligations arising from its activity:

Guarantee Policy for Insurance Brokers No. 6293449 for an insured amount of UF500 contracted with Compañía de Seguros Generales Consorcio Nacional de Seguros S.A., valid from April 15, 2023, to April 14, 2024, establishing the right of the insurance company to reimburse the broker for all amounts disbursed by the former to pay third-parties affected by the broker's deficient brokerage.

Professional Civil Liability Policy for Insurance Brokers No. 6293449 for an insured amount of UF60,000, contracted with Compañía de Seguros Generales Consorcio Nacional de Seguros S.A., valid from April 15, 2023, to April 14, 2024, to protect the broker against possible claims by third parties, with the insurance company having the power to request the broker to reimburse the amount paid to the claiming third-party.

BCI Factoring S.A.

As of June 30, 2023, the Company has approved coverage lines for operators of the Factor Chain International in the amount of MCh\$161 (ThCh\$184 as of December 2022), of which MCh\$80 have been used in 2023 (MCh\$0 as of December 2022).

BANCO DE CRÉDITO E INVERSIONES AND SUBSIDIARIES
NOTES TO THE INTERIM CONSOLIDATED FINANCIAL STATEMENTS
As of June 30, 2023 and December 31, 2022 and for the six and three month-periods ended June 30, 2023 and 2022

BCI Corredores de Bolsa de Productos S.A.

As of June 30, 2023, the Company has Surety Bond No.675251 taken with Banco de Crédito e Inversiones, for UF6,000, in favor of Bolsa de Productos SA, to guarantee compliance with the Company's obligations as a product broker in favor of its principals in compliance with article 11 of Law 19.220. The possibility of paying this bond is covered by a "credit line opening agreement to cover potential guarantee payments issued in Chilean pesos or foreign currency", which is in the possession of the financial institution and is valid up to April 17, 2025.

As of June 30, 2023, the Company has Bond No.675252 taken with Banco de Crédito e Inversiones, for UF2,000, in favor of Bolsa de Productos SA, to guarantee compliance with all its obligations as a product broker in relation to operations invoiced to the Company. The possibility of paying this bond is covered by a "credit line opening agreement to cover potential guarantee payments issued in Chilean pesos or foreign currency", which is in the possession of the financial institution and is valid up to October 17, 2025.

BCI Asset Management Administradora General de Fondos S.A.

Guarantees established in articles 12, 13 and 14 of the Single Fund Law No.20.712.

As of June 30, 2023, there are guarantee policies for all funds and portfolio management, amounting to MCh\$81,495

Fund	Type of Guarantee	Amount MCh\$	Amount Issued UF
Fund	Surety bonds in UF	71,101	1,970,124.40
Portfolio Management	Surety bonds in UF	10,394	288,008.58
Other guarantees	Surety bonds in UF	-	-
Total		81,495	2,258,132.98

This is in conformity with the provisions of article 226 of Law No.18.045 of the Securities Market and NCG No.125 of 2001, which state that General Fund Administrators must permanently maintain a guarantee for each managed fund, which must always be equivalent to UF10,000 or 1% of the average equity of the corresponding calendar year prior to the date of its determination.

Similarly, in order to comply with the requirements of Title IV of Circular 1790, mutual funds defined as collateralized structured funds must have at all times a guarantee granted by a third-party other than the management company.

To ensure compliance with these regulations, BCI Asset Management Administradora General de Fondos S.A. maintains Surety Bonds with the Bank.

a) As of June 30, 2023 and December 31, 2022, the composition of the contingent receivables are as follows:

Total Liabilities	68,152,080	74,241,484	69,265,786	73,367,578

The fair value estimates presented above do not attempt to estimate the value of the Bank's earnings, generated by its business, or future activities, and therefore, do not represent the value of the Bank as a going concern. Loans are shown net of provisions.

The methods used to estimate the fair value of financial instruments are detailed below.

Financial assets at amortized cost

This account includes Loans and receivables from customers and repurchase agreements.

Loans and receivables from customers are shown net of their provision for credit or impairment risk. The estimated fair value of loans represents the discounted amount of future cash flows expected to be received.

Cash flows are discounted at the base market interest rate; in this case, we use an interbank rate, considering the relevant term and currency. The

criteria used for the incorporation of credit risk of the assets considered for these purposes are:

1. From the expected loss estimation models, it is possible to infer about the credit quality of the portfolio (at least in qualitative terms), for the residual term of the operations that make up the asset accounts considered (commercial loans, mortgage loans for housing and consumer loans).
2. In quantitative terms, the provision percentage assigned to an operation is an approximation variable to the credit profile of said operation.
3. The amount resulting from applying the 'provisions/total loans' factor to the present value of the respective loans is an approximation of the adjustment for credit risk.

Liabilities at amortized cost

In this section we include on-demand and term deposits, bank borrowings and debt instruments issued.

The estimated fair value of on demand accounts and deposits, that is, without an established term, including those accounts that do not accrue interest, is the amount to be paid when the client demands it. Therefore, the amortized cost of these deposits is a reasonable approximation of their fair value.

The fair value of term deposits has been estimated based on discounted future cash flows based on interest rate structures adjusted from transactions observed at the measurement date.

The fair value of liabilities with financial institutions has been determined using discounted cash flow models, based on the relevant interest rate curve for the remaining term of the instrument until maturity.

The fair value of these liabilities has been determined using discounted cash flow models, based on the relevant interest rate curve for the remaining term of the instrument until maturity.

Financial assets and liabilities held for trading through profit or loss

The fair value of financial assets and liabilities (fixed income instruments classified as Financial assets at fair value through other comprehensive income, in addition to Derivative instruments) is estimated using the valuation techniques detailed in the following letters.

BANCO DE CRÉDITO E INVERSIONES AND SUBSIDIARIES
NOTES TO THE INTERIM CONSOLIDATED FINANCIAL STATEMENTS
As of June 30, 2023 and December 31, 2022 and for the six and three month-periods ended June 30, 2023 and 2022

Financial instruments measured at fair value

Please refer to Note 2, letter j) for further details on the criteria used to determine fair value.

Hierarchy used to determine fair value

The regulations distinguish between different hierarchies of inputs used for valuation techniques, discriminating between “observable” or “unobservable” inputs. Observable inputs reflect market data obtained from independent sources, and unobservable inputs reflect the assumptions of the Bank and subsidiaries in relation to market behavior. From these two types of inputs, the following hierarchy has been created:

Level 1 – Quoted prices (unadjusted) in active markets for identical assets or liabilities to those being measured. This level includes debt instruments, whether they are fixed or variable income, equity instruments and derivative financial instruments traded on local or international stock markets.

Level 2 – Inputs other than quoted prices included within Level 1 that are observable inputs directly (i.e., as prices) or indirectly (i.e., derived from prices) for assets and liabilities. This category includes prices that require interpolation within a price structure, such as derivative instruments. The same occurs with bonds valued with some valuation technique such as interpolation or matrix pricing, based on inputs that are observable.

Level 3 – Inputs that are not based on observable market data (unobservable inputs). This level includes equity and debt instruments that have significant unobservable inputs.

This hierarchy requires that when there are observable market data, they are used. The Bank and subsidiaries consider observable relevant market data in their valuations whenever possible.

Non-recurring assets and liabilities are presented below according to the hierarchy to determine the fair value.

a) Valuation of La Polar Bonds

As of June 30, 2023 and December 21, 2022, the Bank has applied valuation techniques to determine the fair value of the financial instruments “BLAPO-F” and “BLAPO- G”. Such valuation is based on the IRR of the last existing market transaction between the closing date of the Interim Consolidated Financial Statements and the exchange date of said financial instrument.

b) Level 3 Reconciliation

Value changes in level 3 derivatives are explained by the following reconciliation table

As of June 30, 2023						
Reconciliation level 3	Opening balance	Gain (loss) recognized in profit or loss	Gain (loss) recognized in Equity	Net of purchase, sales, and agreements	Transfers from level 1 and 2	Closing balance

NOTE 47 – RISK MANAGEMENT AND REPORTING

1. INTRODUCTION

Financial risk management is performed throughout the organization, under a framework containing policies that define the criteria and procedures guiding the actions of the Bank and its subsidiaries.

Business activities performed by the Bank involve identifying, assessing, accepting, and managing different types of risks or combinations of risks. The main risk categories to which the Bank is exposed are financial risk, market risk, structural risk, and liquidity risk.

To manage financial risks, the Bank's Board of Directors and Senior Management are responsible for:

- understanding the nature and magnitude of the financial risks assumed, as well as the strategies implemented to manage them;
- directing the management of financial risks using prudential criteria, which avoid exposing the Bank to insolvency or financial instability;
- defining a framework of policies that comprehensively regulate the management of financial risks, considering the best practices in the market, current regulations and the Bank's culture;
- establishing a structure of limits structure that covers all relevant risks, is consistent with the Board of Directors' risk tolerance and current regulatory margins;
- establishing a clear segregation of duties between trading and control activities, so that risk measurement, supervision and information are performed by units that are independent from the risk-assuming areas;
- receiving relevant, complete and timely information; and
- verifying the application of policies and compliance with limits through a continuous internal audit process.

2. GOVERNANCE AND MANAGEMENT

The Board of Directors, through the Executive Committee, approves the policies and defines the level of financial risk tolerance. The Comptroller supervises compliance with risk policies, using independent evaluations. Likewise, the Bank controls exposure to financial risks through the Finance and Risk Committee.

The Chief Executive Officer, as the main individual responsible for the Bank's overall management, must conduct the business strictly adhering to the current legal framework and internal policies, limits and procedures established. He chairs the Assets and Liabilities Committee (ALCO), a body where he is informed about the risks assumed by the Corporation and provides guidelines for such purposes.

The Assets and Liabilities Committee (ALCO) is the highest-ranking executive body assigned to manage financial risks. In its regular meetings, the ALCO Committee reviews the liquidity position, asset and liability management and investment strategies, with due regard to risks assumed.

The Finance Department is responsible for the direct management of financial risks. Such department must implement business, investment, and financing strategies for the Bank to achieve its objectives while minimizing the risks assumed.

The Market and Liquidity Risk Management measures and controls financial risks. This Department is responsible for proposing policies and limits to mitigate risks, as well as designing measurement tools according to the size and complexity of operations.

The limit structure and daily control ensure that risks are within the margins established by the ALCO Committee and approved by the Executive Committee. This is strengthened by an adequate segregation of duties and the control by opposition established in the Bank's organizational structure, which allows managing risks without any conflict of interest.

The Market and Liquidity Risk Management reports on a daily basis risk exposures and the use of limits. In addition, on a monthly basis it communicates the overall financial risk position to the ALCO Committee, so that Senior Management understands the risks assumed, and if required, establishes guidelines.

The supervision of the financial risks performed by the Bank on the subsidiaries is covered by the Subsidiary Control Policy. This is performed through the process of annual review of policies, quantification of risks, definition of stand-alone or consolidated limits, and coordination between the different vehicles when appropriate.

3. MARKET RISK

Market risk represents losses that could affect the value of investment portfolios because of adverse movements in market prices.

Principles for managing market risk include: the use of methodologies to quantify market risks in accordance with the volume and complexity of the activities performed; mechanisms for periodic review of the models used to quantify market risks, including their independent validations; formal and periodic performance of stress exercises, appropriate for the scale and complexity of transactions and daily monitoring of limits and excesses.

In the field of market risks, the following are managed:

Price risk: it is the risk of losses that can cause a change in the value of a portfolio of financial instruments, in trading activities with customers (*market making*) and proprietary investments. This risk is found in all portfolios subject to market valuation.

Basis risk: losses that may originate from an imperfect correlation between two or more market variables used to hedge the risk of a financial position.

Convexity or mismatch risk: losses that may originate when assuming positions in a risk factor, generating mismatches in time periods. Those terms where there is greater market depth should be considered as one of the important variables.

Optionality risk: Buying or writing options carries its own risks. These are closely characterized by the non-linear relationship between the gain generated by the option, the value of the underlying factors and the volatility of such factors.

The Bank separate the management, control, and measurement of market risks between trading portfolios and financial assets at fair value through other comprehensive income portfolios. The former includes positions as a result of the flow of sales to corporate and institutional customers, positions as a result of the market making business, and hedge or trading positions. The latter holds positions that come mainly from the management of interest rates associated with personal and commercial banking loans, in addition to a portfolio of financial investments.

3.1 MARKET RISK IN THE TRADING BOOK

The main market risks generated in the trading book are the following:

Interest rate risk: arise as a result of exposure to movement in the different interest rate curves on which a current position is maintained. The typical products that generate this sensitivity correspond to interest rate derivative products (Swap or Cross Currency Swap), such as those products of the capital market business (Debt Securities, Term Deposits, Futures or other). However, in practice, all financial products are exposed to movements in interest rates due to the effect on the valuation associated with their discount factor.

Currency risk: this risk is generated by the movements from the several exchange rates with the currencies on which current positions are held. This risk is generated in currency spot positions, as well as in any derivative product whose underlying is an exchange rate.

Optionality risk: The purchase or writing of options carries its own risks. These are closely characterized by the non-linear relationship between the gain generated by the option, the value of the underlying factors and the volatility of said factors.

Equity security risk arises as a result of movements in share prices. Such risk is generated in cash positions of shares as well as in any derivative product whose underlying is a share or a variable income index. This type of instrument mainly arises from the subsidiary BCI Corredor de Bolsa, whereas Bank BCI, by regulation, does not have access to these markets.

3.1.1 Management and Limits

The functions established for Financial Risk include the daily control of market risk positions, which implies ensuring compliance with the limits and/or alerts approved by Senior Management. This follow-up is performed regularly to assess the evolution of risk metrics and their significant movements, as well as communicate risks and possible excesses through the channels established for such purposes.

Setting limits for trading market risk is a dynamic process that is associated with the level of risk appetite established by the BCI Corporation. Such process is part of the annual limit review and update plan.

Limits are established on different metrics and are intended to cover all activities subject to this risk from multiple views, applying a prudent criterion, where the main are as follows:

- VaR limits (Total and by risk factor).
- Sensitivity limits to the exchange rate.
- Interest rate sensitivity limits (total and by terms).
- Sensitivity limits for positions in significant products.
- Sensitivity limits for positions in significant spreads.
- Vega limits.

These general limits are supplemented by other sub-limits for structure that is granular to allow the effective control of the different types of trading market risk factors to which the Corporation is exposed in its trading activities.

These limits are approved by senior management (ALCO and/or Board of Directors).

3.1.2 Metrics

- a) VaR (Value at Risk):** this is a methodology that estimates losses that a portfolio would incur as a result of an adverse movement of interest rates and/or market prices over a time horizon and for a certain confidence level.

The VaR methodology used is historical simulation that recognizes the fat-tail property of financial returns. A 2-year rolling window of daily data is used. The 1st percentile of the P&L distribution is measured, or VaR at 99% confidence. The volatility updating technique is used, which recognizes the existence of volatility clusters.

Objectives and limitations of the VaR methodology: The objective of VaR is to measure the risk of a portfolio of assets by determining how much it can lose over a period and with a given level of confidence, under normal market conditions. This method is applied to portfolios that have information on the relevant market variables. In addition, it does not depend on the calculation of correlations and volatilities, as these are calculated implicitly when using historical information, which means having the history of the associated variables to perform this calculation.

The 1-day VaR for each portfolio is shown below.

VaR tables by Portfolio: annual comparison as of June 30, 2023

Figures in millions of Chilean pesos, with a 1-day time horizon.

VAR	2023	2022	Variance
	MCh\$	MCh\$	MCh\$
Trading	1,382	1,771	(398)
Maximum	3,981	5,312	(1,331)
Minimum	521	303	218
Average	1,384	2,307	(923)
Balance	439	800	(361)
Maximum	1,183	1,517	(334)
Minimum	280	247	33
Average	497	727	(230)
BCI Corredor de Bolsa	879	1,421	(542)
Maximum	1,950	1,855	95
Minimum	701	213	488
Average	1,077	666	411
BCI Asset Management	270	187	83
Maximum	386	323	63
Minimum	124	114	10
Average	218	212	6

VaR Trading: Quarterly graphic comparison as of June 30, 2022

Amounts in millions of Chilean pesos, with a 1-day time horizon.

VaR Balance: quarterly graphic comparison as of June 30, 2023

Amounts in millions of Chilean pesos, with a 1-day time horizon.

VaR Bci Corredora de Bolsa: quarterly graphic comparison as of June 30, 2023

VaR Bci Asset Management: quarterly graphic comparison as of June 30, 2023

For the current period, the VaR (Value at Risk) is broken down into the different risk factors that compose it for its management, this corresponds to:

VaR by Risk factor: comparative table as of June 30, 2023 v/s December 31, 2022

Amounts in millions of Chilean pesos			
Value at Risk	2023	2022	Variance
	MCh\$	MCh\$	MCh\$
Total	1,382	1,771	(389)
Interest rate	1,306	1,580	(274)
Foreign currency	164	271	(107)
Optionality	10	15	(5)

Note: consider that the calculation of VAR having correlations, the sum of its factors is not the same related to the Total VAR.

a) **Stressed VaR (sVaR):** there are limitations of the VaR models, mainly in the face of extreme events that have not been noted in the historical information or because they do not capture the intra-day movements in the portfolio. Because of this, stress situations are modeled to assess potential impacts on the value of the most extreme event portfolios. The following analysis presents the Stress VaR study for the main current risks.

Stress VaR: annual comparison as of June 30, 2023

Amounts in millions of Chilean pesos, with a 1-day time horizon.

STRESS VAR	2023	2022	Variance
	MCh\$	MCh\$	MCh\$
Total	4,530	3,130	1,400
Maximum	9,988	8,844	1,144
Minimum	2,797	2,366	431
Average	4,382	4,657	(275)

3.2 COUNTERPARTY MARKET RISK

Counterparty risk management encompasses the management of financial risks that seeks to recognize and subsequently manage the possible credit deterioration of each counterparty, arising from investments and/or businesses related to the capital market.

This risk is defined as the possibility that the issuer or the counterparty does not comply with its obligations or commitments within the agreed terms and amounts. This risk is determined by the debt at the time of default, by the probability of default by the counterparty, and by the loss given default. On a daily basis, the current market value plus the potential future exposure of the derivatives is calculated; estimating the value of the debt in an event of default that has not yet occurred. The potential future exposure represents the maximum market value that the instruments could reach during the remaining term of the contract. The result of this calculation determines the use of the credit facility associated with derivative instruments.

As part of counterparty risk management, Senior Management encourages direct involvement in both local and foreign clearing houses, as applicable, and the trading of derivative instruments must be conducted in accordance with the policies, limits and procedures established by the Bank, in compliance with internal and external regulations, and all new products must comply with the provisions of the New Products Policy prior to being traded.

3.2.1 Management and Limits

The Bank manages its counterparty risk through analysis of the future exposure of financial instruments, called PFE (Potential Future Exposure) and in turn through adjustments to the Fair value of derivative instruments, referred to as CVA (Credit Value Adjustment).

3.2.2 Metrics

- a) **Future Exposures:** The future exposure of an *over-the-counter (OTC) derivative* is directly related to the credit exposure generated by this type of product for BCI. The risk from such contracts exists when the valuation or *mark-to-market (MTM)* is positive in favor of BCI. These contracts are measured on a daily basis, and the risk or uncertainty arises regarding the potential value that the MTM may reach throughout the life of the operation.

Monte Carlo simulation techniques are used to calculate future exposures by counterparty. Specific limits by counterparty ensure that defined risk levels are not exceeded, and adequate diversification is achieved. The following table provides the detail of the exposure for each segment for the periods ended June 30, 2023 and December 31, 2022.

Future Exposure by Banks: as of June 30, 2023

Amounts in millions of Chilean pesos.

Future Exposure		
Banking	June 30, 2023	December 31, 2022
	MCh\$	MCh\$
BCI Bank	2,672,646	2,467,992
Private Banking	162,221	88,535
Banks	263,355	641,300
Corporate	1,078,829	765,047
SMEs	1,364	1,610
Business	31,526	38,110
Large Corporations	132,170	98,075
Real Estate	109,839	104,509
Institutional	893,342	730,806
Total	2,672,646	2,467,992

- b) **Derivative credit valuation adjustment (CVA):** The objective is to determine the expected losses due to counterparty risk in OTC derivative contracts. The CVA of a derivative is defined as the difference between the market value free of credit risk (without risk of default by the counterparty) and the value of the derivative engaged that carries the possibility of default by the counterparty. Accordingly, the CVA of a customer can be obtained from the expected exposure (EE) by counterparty risk (the expected loss amount) and the expected loss rate (EL) associated with the default of the counterparty. The table below details the allowance for CVA by segment for the periods ended June 30, 2023 and December 31, 2022.

CVA (Credit Value Adjustment): as of June 30, 2023

Amounts in millions of Chilean pesos.

Credit Value Adjustment (CVA)			
Banking	June 30, 2023	December 31, 2022	Variation

Total	13,302	14,751	(1,449)

3.3 MARKET RISK OUTSIDE OF THE TRADING BOOK

Financial assets at fair value through other comprehensive income relate to all financial instruments that have not been acquired for trading them at short-term, where the Bank intends to keep them on its balance sheet Instruments that are classified as financial assets at fair value through other comprehensive income may not be subsequently reclassified to the category financial assets held for trading at fair value through profit or loss.

Certain definitions that should be considered for the market of these assets are included below.

Debt Securities (IRF): this is the name given to securities representing medium and long-term obligations, issued in series, intended to finance different production and housing activities. They bear interest and are generally quoted as a percentage of par value.

Portfolio of Non-Derivative Financial Instruments: relates to the set of investment debt securities classified as financial assets at fair value through other comprehensive income, Investments to Maturity and the portfolio of corporate bonds classified in Trading, which weight different economic sectors, issuers, terms, rates (fixed versus floating or mixed rates), currencies, prepayment options, etc.

Investment Grade Instruments: relate to instruments to which the investment grade classification has been associated by one of the international rating agencies: S&P, Moody’s and Fitch. This is equivalent to a BBB- or higher rating for the International market and A- for domestic instruments.

Covenants: restrictions used by banks or institutional investors to ensure that issuers will operate prudently, allowing them to pay their debt on agreed terms. A *covenant* may require the issuer to present its financial statements to the bank or, an extreme covenant, would prohibit it from assuming new debt.

3.3.1 Management and Limits

Like the management of limits for the trading book, for the financial assets at fair value through other comprehensive income book, the duties established by Financial Risk are, in general, the definition of measurement criteria and regular control of the portfolio, which implies ensuring compliance with the limits and/or warnings approved by Senior Management.

Setting market risk limits for financial assets at fair value through other comprehensive income is a dynamic process associated with the level of risk appetite established by the BCI Corporation. This process is part of the annual limit review and update plan.

Limits applied are different for the different portfolios due to their different nature and objectives. We highlight the following market risk limits associated with available-for-sale instruments:

- Interest rate sensitivity limits. It is the maximum amount by which the market value of the investment portfolio can change due to a one basis point increase in discount rates.

BANCO DE CRÉDITO E INVERSIONES AND SUBSIDIARIES
NOTES TO THE INTERIM CONSOLIDATED FINANCIAL STATEMENTS
As of June 30, 2023 and December 31, 2022 and for the six and three month-periods ended June 30, 2023 and 2022

- Diversification limits. Investment concentration limits by country, type of industry and business.
- Portfolio permanence limits. According to the business model, the investments must remain a minimum amount of time in the portfolio as a whole.

3.3.1.1 Metrics Sensitivities and positions

The sensitivity analysis assesses the impact of one basis point on the interest rates at which each of the instruments in the financial assets at fair value through other comprehensive income investment portfolio are performed at fair value.

Evolution of DV01 Investment book and Liquidity management. Amounts in millions of Chilean pesos

The main positions in investments available for sale by type of issuer and currency are detailed below. The risk rating of such positions at the end of the most recent period is also reported.

4. STRUCTURAL INTEREST RATE RISK

The management of the structural risks of interest rates and inflation seeks to manage the risks arising from the Bank's operations and asset and liability positions, derivatives, and non-derivatives, excluding trading activities.

In this area, the following risks are managed:

- **Interest rate risk:** possibility of economic losses in the Bank's equity position (profit or loss or equity) as a result of adverse and unexpected changes in interest rates (parallel movements in the level of general rates and spreads).
- **Repricing risk:** arises from differences in the maturity or repricing structure between assets and liabilities, as well as off-balance sheet positions. Repricing risk occurs when there are gaps or mismatches in the maturity structure or " *repricing* " of the Bank's assets and liabilities, whether on or off the balance sheet (e.g., positions in derivative financial instruments, contingent loans, etc.). Exposure varies according to the magnitude of the mismatches and the direction of the change in rates.
- **Risk in the structure of interest rates:** arises from changes in the shape of the intertemporal structure of interest rates.
- **Base risk:** results from the existence of an imperfect correlation in the adjustment of interest rates received and paid on certain financial instruments, which should have similar adjustment characteristics in their prices.
- **Optionality risk:** arises from short positions in implicit options both in assets, liabilities as well as in off-balance sheet instruments or explicit options. This risk includes the option of a prepayment of loans, translating this payment option as a prepayment risk.
- **Inflation risk:** possibility of economic losses in the Bank's equity position (profit or loss or equity) as a result of adverse changes in the price path or price index.

4.1 Management and Limits

Currently, limits are set on the following metrics to ensure consistency with the Bank's strategic objectives and avoid risk situations in stress scenarios (illiquidity, loss of profitability, among other).

- **Short-term risk:** it is controlled with the *SaR methodology*, the result of which may not be higher than a percentage of the Bank's financial margin.
- **Long-term risk:** controlled by the *MVS methodology*, the result of which may not be higher than a percentage of the Bank's basic capital.
- **Limits** are established **for metrics X1** (short-term rate risk) and **X2** (long-term rate risk) of the C40 regulatory report.

4.2 Metrics

Unexpected changes in interest rates or inflation can have negative effects on both the Bank's profit for the period and economic value. Exposure to interest rate risks is noted in:

1. The short-term impact on the Bank's revenue (typically 1 year).
2. Long-term impact on the present value of future cash flows.
3. The impact on other sources of revenue.
4. This view allows using two supplementary methodologies to assess such exposure to interest rate risk:

Accumulated Net Interest Margin (Spread at Risk, *SaR*)

The analysis focuses on the impact associated with variations in interest rates and short-term inflation on annual revenue The analysis is performed considering the impact of changes in interest rates on the Bank's financial margin over a given time horizon.

Economic Value (Market Value Sensitivity, MVS)

The economic value of a bank can be expressed as the present value of the expected net cash flows, defined as the expected cash flows of assets less the expected cash flows of liabilities, plus the expected net flows of positions recorded off-balance.

As the economic value considers the potential impact of changes in interest rates on the present value of future cash flows, it provides a better view of the potential long-term effects of changes in interest rate structures.

The average long-term SVM measurement for 2023 is 3.35% (4.77% 2022) of capital over a limit of 12%. The SaR meanwhile has an average in 2023 of 4.18% versus an average of 5.62% in 2022.

SVM
As of June 30, 2023

SaR
As of June 30, 2023

The evolution of regulatory indices X1 (exposure to short-term market risk) and X2 (exposure to long-term market risk) registered slack with respect to the limits so far in 2023, mainly explained by the management of the balance sheet with accounting hedges.

Regulatory Market Risk X2
Banco de Crédito e Inversiones and City National
Bank As of June 30, 2023

5. LIQUIDITY RISK

Liquidity management is a strategic activity, it must be aligned at all times at the corporate level in terms of its objectives, guidelines and resources assigned in the commercial line, risk control, financial operations, and technology, among other areas.

For these purposes, the liquidity risk will correspond to the impossibility of:

- Comply with contractual obligations.
- Avoid regulatory sanctions for non-compliance with regulatory ratios.
- Permanently and competitively finance commercial activity.
- Liquidate positions without significant losses.

The concentration of liabilities by main sources of funding is presented below.

Evolution of main sources of funding
As of June 30, 2023 and December 31, 2022
Banco de Crédito e Inversiones and City National Bank

5.1 Management and Limits

The Bank's liquidity management policy and models seek to guarantee, even in the face of unexpected events, the Bank's ability to adequately respond to its obligations.

Liquidity and funding management is performed by treasury in accordance with practices and limits aligned with local regulations, best international practices, and the Bank's risk appetite. For this reason, the Bank must maintain a limit structure that allows an adequate and robust risk management. Currently, limits are set on the following metrics:

Liquidity barrier: A ratio that is controlled on a daily basis and whose objective is to constitute a minimum highly liquid reserve fund, which allows it to face unexpected situations of illiquidity, bank runs or confidence crises. The limit is reviewed at least annually.

Concentration of deposits and time deposits: it is controlled on a daily basis, to prevent the Bank from being exposed to a sudden outflow from its source of funding.

Accumulated cash flow mismatches: it is controlled on a daily basis, to ensure that there is a sufficient income flow to meet short-term obligations.

Liquidity coverage ratios (LCR): controlled on a daily basis to provide a liquidity structure that is capable of withstanding a stress scenario in the short term. The LCR measures a bank's liquidity risk profile, ensuring that it has an adequate pool of high-quality assets (ALAC), which can be easily and immediately converted into cash, without significant loss of value, in the financial markets.

Net Stable Funding Ratio (NSFR): requires banks to maintain a stable funding profile in relation to their assets. The objective is to reduce the risk that the volatility of funding sources deteriorates the Bank's liquidity position. It is controlled on a daily basis, seeking to discourage excessive short-term wholesale funding. The metric seeks for the Bank to diversify its sources of financing.

Since the latter are the main ratios of liquidity, it should be noted that they have remained comfortable with respect to both regulatory and internal limits.

5.2 Metrics

→ Liquidity barrier

The liquidity barrier established in BCI consists of a minimum *buffer* of highly liquidity and credit quality assets, of a counter-cyclical nature in relation to liquidity, whose purpose is to support the ability to cover short-term obligations.

The measurement of the level of requirement of the barrier considers on average the wholesale DAP maturities, issued bonds, liquidity provision of subsidiaries and external funding (Miami Branch) of the last year.

To comply with the requirement of a minimum buffer of High-Quality Liquid Assets, two short-term measurement periods are defined, which constitute an Alert (15 days) and a Limit (10 days). Both values are reviewed and updated annually by the Financial Risk team. As of June 30, 2023 and December 31, 2022, the liquidity barrier is as follows:

	As of June 30, 2023				As of December 31, 2022			
	Average	Maximum	Minimum	Close	Average	Maximum	Minimum	Close
Liquidity Threshold (*)	5,460,724	6,470,192	3,875,541	5,710,893	3,317,225	5,795,916	1,562,036	5,167,482

(*) Amounts in millions of pesos.

Liquidity barrier evolution as of June 30, 2023
Amounts in millions of Chilean pesos

→ Liquidity Coverage Ratio (LCR)

This ratio is within the Basel III standards and aims to ensure that banks have an adequate fund of High-Quality Assets (ALAC), which can be easily and immediately converted into cash, to meet their obligations in a 30-day liquidity stress scenario. This ratio has a regulatory limit and will increase to 100% as of June 2022. Its form of measurement is ALAC on net expenses, where the different items have different weights.

As of June 30, 2023 BCI had a Global consolidation LCR of 165.7%, well above the required limit, given the current regulation.

	As of June 30, 2023				As of December 31, 2022			
	Average	Maximum	Minimum	Close	Average	Maximum	Minimum	Close
LCR	174.1%	184.3%	165.7%	146.1%	189.5%	343.0%	110.4%	166.3

As the latter are the main indicators of liquidity, note that they have remained comfortable with respect to both regulatory and internal limits.

LCR evolution as of June 30, 2023
Average Maximum Minimum

→ **Net Stable Funding Ratio (NSFR)**

This ratio is designed to address long-term liquidity mismatches and covers the entire balance sheet by providing incentives for financial institutions to use stable sources of funding. It is measured given the Stable Financing Available (FED) over the Stable Financing Required (FER), the first being the proportion of own and external resources that are classified as reliable. The FER, on the other hand, corresponds to the book value of the assets based on the characteristics of liquidity and residual maturities.

Currently, this ratio has a 60% of the regulatory limit, however, the Bank has decided to consider an incremental internal limit, which expects to reach a 100% NSFR requirement in 2025. As of June 30, 2023 BCI placed its Global consolidation NSFR at 101.7%.

	As of June 30, 2023				As of December 31, 2022			
	Average	Maximum	Minimum	Close	Average	Maximum	Minimum	Close
NSFR	103.0%	104.3%	101.7%	104.4%	101.6%	105.0%	100.4%	102.2%

NSFR evolution (global consolidated) as of June 30, 2023

→ **Liquidity early warning ratios**

BCI has a set of early warnings that allow capturing negative trends in the markets or in the balance structure. Both market variables and information from the Bank's balance sheet are monitored. The funding liquidity prizes in local banks, or the increase in the volatility of market prices, are some of the market variables that stand out. On the other hand, demand deposit flight rates or *deficits* in the renewal of time deposits are relevant balance sheet information among other elements of periodic monitoring.

→ **Mismatch of deadlines**

The mismatch is the metric that determines the difference between Expenditures and Income of the flows of the main items of the Bank. For its determination, adjusted flows were considered, that is, considering behavioral models for some items. In this sense, for example, the liabilities associated with financial and non-financial calls are considered, considering the unstable part and the stable part as the demand balance according to their behavior. Below is the mismatch of terms at 7, 15 and 30 days in the case of the local version considering adjusted flows.

Local consolidation term mismatch as of June 30, 2023

Additionally, the relevant metrics for mismatching at 30 and 90 days for the individual version are presented.

In addition to the aforementioned metrics, it is important to highlight the distribution of high-quality Liquid Assets held by the Bank for optimal liquidity management.

Composition of liquid assets as of 06/30/2023

→ **Concentration of Time Deposits and Funding**

Below is the concentration by counterparty for on demand and time deposit items.

→ **Maturity of non-derivative and derivative liabilities**

To see the details of maturities, it is recommended to see note 45 - Contractual Maturity according to the remaining terms of financial assets and liabilities.

6. FINANCIAL RISK STRESS TESTING EXERCISES

Stress tests are risk measurement tools designed with the aim of gaining a deeper understanding of the profile and dynamics of the different market and liquidity risks associated with Trading and Banking books about:

- Measurement of the impact of extreme movements in the markets (prospective, hypothetical, historical and idiosyncratic)
- Isolated measurement of the impact of a particular/specific risk component
- Measurement of a dynamic interdependence between relevant risk factors

The stress tests are intended to identify financial vulnerabilities in the balance sheet structure and trading book against low probability but plausible situations or risk scenarios that can be seen in a short-term horizon. The analysis separates the impacts on those positions that affect the income statement from those that affect the equity accounts.

The scope and criteria for the development of stress tests are given by:

- Limitations of the methodological approaches used: these approaches intervene in the calculation of the shocks to be applied in the different scenarios and their limitations correspond to obtaining the shocked curves that are modeled from macroeconomic factors. Therefore, there is a tolerance margin of how this modeling of curves can be explained by macroeconomic factors.
- For liquidity stress scenarios, these are configured, on the one hand, by calibrating prices and system stress measures (monitor of market conditions), as well as short-term impacts (30 days and 90 days) on the structure balance.
- The market monitor is calibrated by estimating the price levels at which the stress scenario is estimated. In the case of historical scenarios, the basic argument is historical information and estimates of the impact of the crisis, while in the case of prospective scenarios, the analysis is based on the risks inherent to the banking industry, which are included with information to raise awareness of risk scenarios and vision is essential.
- On the other hand, the changes in the balance sheet structure are projected as stress scenarios, and in no case are the estimates based exclusively on historical measurements. Depending on the level of criticality of the estimated market conditions for each scenario, conservative estimates of leak rates and balance sheet movements are projected. In general, the higher the estimated criticality for each scenario, the higher the leakage rate associated with the sources of funding. In addition, depending on the characteristics of the depositor and the estimated stability of the deposits, the flight rates are modeled with different movements and sensitivities to stress scenarios.

- The bank's capacity to absorb potential losses is contained within the established risk appetite and the action plans that the bank has to modify its risk profile.

- Action plans: As a preventive financial measure, BCI constitutes the liquidity barrier, which represents the minimum level of liquid assets evaluated to ensure liquidity even in extreme illiquidity events, calibrated with the level of tension that the system evidences. In addition to the above, to take action in the face of any liquidity contingency, BCI has a Liquidity Contingency Plan, which meets with a liquidity contingency committee (CCL). The CCL must consider various sources of funds to face a liquidity crisis. The set of tentative actions, visualized before performing a risk scenario, may consider:
 - a) Subordinate trading portfolio to declarations of liquidity needs. The amount may vary according to the considerations of the committee, and the entire portfolio may be used for liquidity purposes in case of contingency.
 - b) Manage funding sources. Stimulate the raising of funds with adequate prices in the event of a contingency declaration.
 - c) Conditions to make FPL and Repos with the Central Bank. The Liquidity Sub-Management will manage, at its discretion, the use of facilities with the Central Bank of Chile.
 - d) Stimulate Sales with an agreement, Repo, and funding via TRS when feasible. Monitor assets to finance the contingency. Potential available monitoring of Barrier Papers, Monitoring of Liquid Assets issued abroad, in BCI, Miami Branch and City National Bank portfolios.
 - e) Use of local and international interbank lines. Costs and ease of use of the available lines will be evaluated.
 - f) Use window discount FED. Semi-annual monitoring of fund-raising capacity with FED window discount.
 - g) Sale of loan portfolio subject to evaluation by the contingency committee.

6.1. Scenario Analysis

The scenarios associated with the banking book seek to capture, through hypothetical, prospective or historical scenarios, the dynamics between nominal short-term and long-term rates and inflation (Real TPM). These effects are represented by shocks in the rates in the different time horizons, reflecting the variations in inflation expectations if they correspond to each scenario.

For their part, the trading book scenarios aim to capture movements in relative prices as a result of changes in expectations or flows in derivative instruments associated with differentials in external and internal rates that allow us to identify risk exposures outside the normal behavior of the portfolio.

At least 3 scenarios are established, which aim to measure the bank's exposure to stress situations observed at a global and/or systemic level. These were conceived based on expert opinion, historical crisis situations and developed with econometric techniques.

The proposed scenarios are:

- I. Historical.
- II. Adverse.
- III. Dynamic.

I. Historical scenario

The mortgage default crisis in the US inevitably led to a counterparty crisis and severe liquidity shortages that had profound repercussions on the real economy and global financial markets.

Stock markets in the US fall more than 4%, Asian markets 5%, the most important markets in Europe fall an average of 3.3%, Brazil falls more than 7% and Argentina more than 5%, all this on the same day of the fall of Lehman Brothers.

Copper for its part falls 53%, WTI 50%, Japan 38%, Dow Jones 30%, and Chile 16%. All these 3 months after the fall.

In the 2 months following the fall of Lehman Brothers, the dollar rises 21% while the Euro strengthens against the dollar by more than 3% during the first week after the Lehman crash, although it ends up collapsing by more 12% during the first two months.

II. Adverse scenario

The pessimistic scenario is characterized by external and domestic impacts. Externally, there is a global recession (USA, Asia, Europe and Latam) accompanied by a lower demand for commodities. At the local level, there is a strong contraction (economic recession) in the construction, commerce, and mining sectors.

Commodity prices (copper price) plummet as a result of the global recession. World demand for Chilean exports decreases significantly, accelerating the external imbalance. Imports of capital goods fall sharply. The exchange rate depreciates significantly amid massive capital flight, generating inflationary pressures.

The labor market deteriorates, unemployment increases, salaried employment and wages fall sharply, the MPR (monetary policy rate) falls in the face of a smaller output gap and strong inflationary pressures. As a final consequence, the GDP contracts significantly throughout the stress scenario, converging to a lower growth rate in the long term.

III. Dynamic scenario

In this scenario, the most adverse historical shocks are faced with respect to the current rate structure, and monthly shock rate scenarios are defined. The period to be selected is the one that generates shocks at the 1% and 99% percentile.

The scenarios proposed for the liquidity stress tests are:

- IV. Historical.
- V. Adverse.
- VI. Idiosyncratic.

IV. Historical Scenario

The determination of these is based on the use of historical data of the banking system obtained from the web page of the Financial Market Commission of Chile (CMF). The time series of the most relevant income and expense items of the balance sheets of the banks in the financial market, as well as off-balance sheet items, are used. To select the historical scenario, the result of applying the leakage rates of each scenario (each date) on the 30 and 90-day flows of the relevant balance sheet items used in the Liquidity Stress Exercise is calculated. The scenario selected will be the one that generates the highest net outflows (outflows minus revenues).

V. Adverse Scenario

The pessimistic scenario is characterized by external and domestic impacts. At the external level, there is a world recession (USA, Asia, Europe, and Latin America) accompanied by a lower demand for commodities. Locally, there is a strong contraction (economic recession) in the construction, trade, and mining sectors.

Commodity prices (copper prices) plummet as a result of the world recession. World demand for Chilean exports decreases significantly, accelerating the external imbalance. Imports of capital goods fall sharply. The exchange rate depreciates significantly amid massive capital flight, generating inflationary pressures.

The labor market deteriorates sharply, unemployment increases, salaried employment and wages fall sharply, the monetary policy rate (TPM) falls in the face of a smaller output gap and strong inflationary pressures. As a final consequence, GDP contracts sharply throughout the stress scenario, converging to a lower growth rate in the long run.

VI. Idiosyncratic Scenario

To develop the basis for BCI's idiosyncratic scenario, we opt for the analysis of a historical liquidity crisis triggered by non-systematic factors. This is because it is considered that the definition and simulation of idiosyncratic effects by themselves and independent of empirical impacts would require a series of assumptions that at an aggregate level could generate a series of validity problems such as the deterioration of the specification of the models used or the obtaining of insignificant or even infeasible results.

To carry out this work, we first analyze the background of the case of the Bank under Study, the reasons and impact of the crisis, and then we define the methodology to simulate the impacts that such a scenario would have if experienced by BCI according to its own characteristics.

6.2 Results and impacts

→ Market risk

The following tables show the results of the banking and trading books, distinguishing the effects on the income statement from the effects on the bank's capital.

*Summary of Banking Book results as of June 30, figures in millions of CLP
(Impacts are measured for the next 12 months)*

Banking Book	Inflation	Reprice	PnL
Historical	(10,675)	836	(9,839)
Adverse	(13,665)	63,333	49,668
Dynamic Perc. 1%	(3,514)	16,588	13,074
Dynamic Perc. 99%	(9,842)	(19,283)	(29,125)

*Summary of trading book results as of June 30, 2023, figures in millions of CLP
(Impacts are measured based on the duration of each scenario)*

Liquidity risk

The following tables show the results of the effects on the Bank's liquidity, in each of the scenarios:

Table # 5: Additional Needs of Funds for liquidity 30 and 90 days to June 30, 2023
(Figures in Billions of CLP)

	Demand for Liquidity 30 days	Demand for Liquidity 90 days	Available Liquid Assets	Liquidity Needs
Historical	1,582	1,269	6,034	-
Adverse	1,574	1,896	6,081	-
Idiosyncratic	1,970	902	5,804	-

Survival Period: From the data obtained for the Bank's liquidity stress test, it can be observed that the survival period under the Historical and Idiosyncratic Scenario is less than 30 days. On the other hand, in case of the Pessimistic Scenario, the survival period is between 30 and 90 days.

7. OPERATIONAL RISK

Introduction

Bci has adopted the Basel Committee's definition of Operational Risk, which defines it as the "risk of loss resulting from inadequate or failed internal processes, personnel and systems or from external events". This definition includes technological risk and legal risk.

Operational risk is a risk inherent to all banking products and services, processes, and systems, therefore, the effective management of this risk is a fundamental element of Bci's risk management program.

Description of operational risk policies

Our Operational Risk Policy establishes the management framework for this risk, which contains the necessary elements for its governance, executed through the actions of different committees defined in this policy, which aim to build a robust culture for effective management; through the process of identifying and managing risk on an ongoing basis; measuring; defining strategies for its mitigation; reporting and operational risk culture, establishing clear roles and responsibilities based on the three lines of defense approach.

The principles of the policy are as follows:

- The Board of Directors and senior management promote the generation of a healthy risk culture in all Bci's operational risk collaborators.
- Bci has a framework for operational risk management consistent with the volume and complexity of its activities, which is implemented throughout the organization.
- Bci manages operational risk based on the three lines of defense approach, where all employees assume and understand their roles and responsibilities with respect to operational risk management.
- For Bci, operational risk management is a fundamental element for the achievement of the business strategy. By strengthening the internal control environment, we promote the generation and maintenance of safe, simple processes with effective controls to reduce losses, claims, operational and technological incidents, improve the customer experience, and protect Bci Corporation's assets and reputation.

BANCO DE CRÉDITO E INVERSIONES AND SUBSIDIARIES
NOTES TO THE INTERIM CONSOLIDATED FINANCIAL STATEMENTS
As of June 30, 2023 and December 31, 2022 and for the six and three month-periods ended June 30, 2023 and 2022

The policy considers the guidelines and requirements established by the Financial Market Commission and the recommendations of the Basel Committee regarding good operational risk management practices.

Operational risk management structure

The Bank manages its operational risks on a day-to-day basis and makes decisions with a solid Corporate Governance structure as follows:

Committees formed by Directors:

- **Executive Committee of the Board of Directors:** responsible for approving operational risk policies that address the relative importance of operational risks considering the volume and complexity of operations and approval of the Operational Risk Appetite.
- **Finance and Corporate Risk Committee,** responsible for monitoring the levels of Bci's different operational risks.
- **Directors' Committee:** takes cognizance of significant operational risks detected by the Comptroller's Office, third line of defense, Non-Financial Risk Management, External Auditors, or other sources, and is informed of the action plans or measures that have been defined or are being implemented to mitigate them. Analyzes reports on inspection visits, instructions and presentations made by regulatory agencies related to Operational Risk.

Committees formed by Senior Management:

The committees formed by the General Manager and/or first level managers reporting to the General Manager that have a direct relationship in the management of operational risk are as follows:

- **Operational Risk and Information Security Committee.** This committee is chaired by Bci's Chief Executive Officer and is responsible for operational risk strategy and management in the Bank and its subsidiaries.
- **Operational Risk and Information Security Committees specific to risk management in each line of business.** There are 4 separate committee sessions for the Finance Division, Wholesale Banking, Retail Banking and MACH. Each of these committees is chaired by the respective first level Manager reporting to the General Manager of these four Business and Support Units, who is responsible for operational risk management in each Business.

Committees specializing in the management of specific operational risks

The purpose of these committees is the specific and specialized management of operational risks:

- **Information Security and Cybersecurity Committee:** Committee responsible for the governance of the information security and cybersecurity management system, made up of representatives from various areas of the Bank, who ensure that the regulatory framework is kept up to date with new risks and threats, the implementation and monitoring of the security manual and compliance with specific policies and information security and cybersecurity program.
- **Risk Management Committee for Outsourced Services:** Committee responsible for the governance of operational risk management in services provided to third parties and strategic suppliers.
- **Corporate Business Continuity Risk Committee:** Committee responsible for the governance of business continuity management, disaster recovery plan and crisis management.
- **New Products Committee:** Committee responsible for risk analysis in new initiatives and the launch of products and services with identified and controlled risks.

Operational risk management in subsidiaries

With respect to operational risk management in the subsidiaries, the operational risk work methodologies have been continuously reinforced with the risk management teams of the Bank's subsidiaries, who execute the risk management program in each subsidiary with an independent corporate governance, coordinated and aligned with the policies, risk appetite framework and corporate risk governance.

Non-Financial Risk Management

It is responsible for designing policies, programs, and methodologies for the adequate management of non-financial risk, understood as the different types of operational risks and compliance risks, among which are the prevention of money laundering and regulatory risks. The role of this management is to mobilize the execution of the activities of this risk management program, measure and monitor the level of risk independently from the first line. Responsible for the development of governance committees and the reporting of risk levels.

Non-Financial Risk Management is actively involved in:

- **Operational Incident Management.**

The Bank has systems, procedures, organization, and governance in place to identify operational incidents, assess their impact, mitigate their effects, monitor security and operations, and report them in a timely manner. Incidents are a source of root cause analysis and implementation of improvement plans, which are shared with the CMF.

- **Information Security and Cybersecurity**

The Bank has an information security and cybersecurity strategy based on industry best practices that is supported by a comprehensive management program, whose main component is the general information security policy approved by the Executive Committee of the Board of Directors and reviewed annually, complemented by a regulatory body of specific control regulations, a security culture program aimed at employees, customers and suppliers, continuous vulnerability analysis and ethical hacking programs, and an organization made up of specialized areas in the Bank's three lines of defense, oriented to the operation of security controls and the specialized management of these risks.

The information security and cybersecurity strategy contemplate the execution of various initiatives and investments to strengthen the technological infrastructure, team training and specific cybersecurity operation and monitoring processes, aimed at preventing, detecting, and stopping cyber- attacks on the bank and its subsidiaries.

- **Business continuity and crisis management**

The business continuity and crisis management strategies developed during the last few years have been consolidated, adding new risk scenarios, and increasing the coverage of the plan to different units that need to maintain the continuity of their services in the event of contingency scenarios.

The Bank is permanently working on strengthening its business continuity plan and on training the teams that make up the contingency and crisis management teams. The coverage of the plan has increased according to the Bank's requirements, including the processes that require it according to their criticality.

- **Fraud Prevention**

This function is responsible for implementing a corporate fraud prevention strategy, both internal and external, to protect the assets of our clients and the Bank, as well as the reputation and image of BCI. To this end, processes, technologies, methodologies, and models have been reinforced to make optimal decisions in real time, to prevent and anticipate emerging and sophisticated fraud risks, as well as activities have been performed to reinforce the culture and adherence to the ethical framework for the good performance of the Bank's employees and its subsidiaries.

- **Operational risk management in outsourced services**

The Non-Financial Risk Management has a risk management program for outsourced services for the Bank, the purpose of which is to identify and manage in a timely manner the risks that may exist in a process to be contracted or contracted to a third party. This management is performed during the entire life cycle of the outsourced service, that is, from the time the service is contracted until the contractual relationship is terminated. Depending on the risks identified, decisions are taken to keep the risks within acceptable levels for BCI.

- **Insurance**

BCI Corporation has risk mitigation programs through insurance policies that transfer the risk of high-severity losses.

- **Security procedures and controls**

The Corporation has adequate security controls for the physical protection of cash, negotiable instruments, precious metals, and client assets.

- **Prevention of Money Laundering and Financing of Terrorism**

The objective of the "Prevention of Money Laundering and Financing of Terrorism" program is to ensure full compliance with all applicable regulations on these matters, both in Chile and in all countries where Bci operates, thus preventing the Corporation from being used by third parties to launder funds derived from illegal or criminal activities, or to facilitate the transfer of funds for the purpose of financing terrorist operations.

- **Regulatory Risk Prevention:**

Crime prevention program

Bci has a crime prevention program certified by an independent organization, established in accordance with the provisions of Law No. 20,393 on Criminal Liability of Legal Entities, which establishes a corporate organization to prevent the commission of these and other crimes by some of the members of Bci. Therefore, it seeks to prevent and avoid the commission of behaviors described in this regulation and to guarantee that, in the event that any employee engages in any of these behaviors, he/she will do so not only in contradiction with the corporate culture, but also in spite of the efforts made by the company to prevent it.

Program for the Protection of Free Competition

The objective of the Program for the Protection of Free Competition is to avoid anti-competitive practices, which are established in DL 211, because they can delay the development of new goods and services, the efficient allocation of resources, the adequate satisfaction of needs, and the participation of new and better suppliers of goods and services in the different markets.

- **Regulatory Management**

Bci performs all its activities in strict compliance with the applicable regulations, both external and internal, in all countries and jurisdictions in which it operates. To this end, there is a continuous process of review of new external regulations for their incorporation into the internal regulatory framework.

Exposure to losses from Operational Risk events

Figures are in millions of Chilean pesos and correspond to the accumulated between January and June 2023.

Event type	Event type	Event type	Event type
Internal fraud	(43)	21	(22)
External fraud	(5,249)	1,946	(3,303)
Labor practices and business safety	(505)	-	(505)
Customers, products and business practices	(323)	8	(315)
Damage to physical assets	(144)	135	(9)
Business interruption and system failures	(252)	29	(223)
Process execution, delivery and management	(742)	68	(674)
Totals	(7,258)	2,207	(5,051)

8. CREDIT RISK

a) Credit risk structure

Credit risk is defined as the probability that a given counterparty will not be able to repay the resources delivered by the creditor institution under the originally agreed conditions, resulting in the loss of part or all the amount loaned or agreed interest. This breach may be due to capacity, disposition, transferability, or convertibility.

Likewise, there are sub-risks that arise from contractual conditions with customers, but which were not necessarily generated by a monetary disbursement from Bci. In short, credit risk is the sum of payment risk, contingent risk, market and counterparty risk, *overnight position* risk and *settlement risk*.

The Bank assumes the entire credit risk while the obligation of the client or counterparty is in force. The risk is extinguished with the full payment of principal, interest, and readjustments.

Credit risk governance

At Banco BCI, credit risk governance is determined by the interaction of the various areas, as well as by the instances in which the Board of Directors and Senior Management participate. The main roles and responsibilities in the field of credit risk governance are as follows:

Executive Committee of the Board of Directors: The Board of Directors, through this body, is responsible for approving general risk policies; reviewing and approving credit operations submitted to its resolution; approving credit and risk policy manuals; determine the resources that will be allocated periodically to provisions and penalties.

Finance and Corporate Risk Committee: Committee in which the directors participate and whose objective is to monitor and control the credit risk profile and periodically monitor the evolution of adherence to risk tolerance, analyze the proposed measures when they reach critical levels and requests that the pertinent measures be adopted to prevent the limits established for such ratios from being exceeded.

Credit Risk Management: Reports to the Corporate Risk Management and has the following objectives and responsibilities; execute the origination process under the tolerance framework and risk policies, collaborate with commercial teams in business configuration, monitoring of debtors, raising early warnings (visits, financial information, behavior, etc.) and execution of strategies defined.

Credit resolution instances: The Bank has structured its credit approval process based on personal and non-delegable credit powers granted by the Board of Directors. Based on these credit faculties, the operations are approved at the different levels of the Administration, always requiring the concurrence of two executives with faculties.

As the amount of the operation increases, it is approved by pairs of senior executives from both the commercial and risk areas and senior management committees, up to the highest instance that corresponds to the Executive Committee of the Board of Directors.

Below you can see a matrix scheme of the main functions of credit risk:

The credit risk environment is a continuous process in which various areas interact, whose functions are intertwined for the development of a governance and management chain.

Main equipment and its functions

Commercial teams / Risk Strategy: they evaluate and establish the initial credit configuration of the customers in accordance with the current policy framework. They are also responsible for collecting and validating information for credit evaluation and entry into the systems; resolve or recommend credit operations within the framework of its powers and the level of risk; verify course documentation and approval conditions; give permanent follow-up and ensure the adequate qualification of its portfolio.

Origination Risk: responsible for the execution and permanent optimization of the origination process, under the framework of tolerance, policies, and appetite for risk. This team must resolve or recommend credit operations within the framework of its powers and their risk level; ensure and execute an adequate integration to the monitoring and collection process; participate in the Strategic Risk, Tolerance, and Model Risk Councils and Credit Committees.

Policies: responsible for the administration, drafting, renewal and adherence control of the Bank's policies. Credit policies are presented and authorized annually by the board of directors.

Monitoring: responsible for monitoring the portfolio and its debtors, as well as adherence to risk strategies.

BANCO DE CRÉDITO E INVERSIONES AND SUBSIDIARIES
NOTES TO THE INTERIM CONSOLIDATED FINANCIAL STATEMENTS
As of June 30, 2023 and December 31, 2022 and for the six and three month-periods ended June 30, 2023 and 2022

Rating: its function is to properly interpret the rating regulations for individual portfolio customers and ensure their correct application in the Bank. Likewise, the team must ensure the correct constitution of provisions for the individual portfolio.

Prosecutor's Office: it is responsible for informing companies and powers of attorney of customers, legal entities, to act. You must generate documentation that allows the legal support of the operation courses (promissory notes, credit applications, etc.); report guarantees and prepare the necessary documentation and the correct constitution when appropriate.

Collection: its function is to monitor and execute collection processes for customers with high delinquency.

Model Factory: responsible for developing risk models to leverage comprehensive credit process decisions (origination, monitoring, and collection) and in all customer segments (Individuals, SMEs, and Wholesale & Investment Banking). Likewise, it must generate models for the management of non-financial risks, among which the prevention of asset laundering and operational risk management stand out. Likewise, the area is responsible for managing risk data.

Comprehensive model risk management: unit that performs independent controls and tests to ensure that the models built for credit risk management meet the desired standards and the purpose for which they were designed. Likewise, it has the role of certifying the models associated with provisions for credit loss.

Operations (ACA): responsible for ensuring that operations are processed in accordance with the criteria approved by the credit solver, validating, among other things, the validity, the margins, and the conditions.

Exploitation of policies: area responsible for the margin loading processes and owner of the limit control systems.

b) Credit risk measurement methodologies

In accordance with the provisions of Chapter B1 of the Compendium of Accounting Standards for Banks, banks must permanently evaluate their portfolio of loans and contingent loans, to timely establish the necessary and sufficient provisions to cover the expected losses associated with the characteristics of debtors and their credits, which determine payment behavior and subsequent recovery.

The Bank has a series of models that are applied depending on the type of portfolio and operations. These models are approved by the Board of Directors, who is informed annually of the sufficiency of provisions. In accordance with the standard, the provision models are divided into individual portfolio or group portfolio models. These models, as well as other management models, are managed through a mature governance structure, whose components are:

- Policies and Regulations: clearly establish the roles and responsibilities of each unit involved in this process. The guiding principles are control by opposition and the fact that management is based on three lines of defense. These policies and regulations also establish the approval routes of the models according to their inherent risk.
- Collegiate Structures: The different councils that officiate as approval instances, as well as where corrective and alignment measures are taken to guarantee the correct management of the risk implicit in the use of models are: The Technical Council of Models, the Council of Risk of Models, the Management Committee, and the Executive Committee (Board of Directors). The instances necessary for approval are determined by the Inherent Risk of the model to be approved.
- Units participating in Model Management are divided into three lines of defense:
 - First Line: This line includes the teams that develop analytical solutions, monitor the implemented models, deploy said solutions (IT) in the Bank's systems, and the business units that use said results and integrate them into management. Its objective is to ensure the transparency and sustainability of the model throughout its life cycle.
 - Second Line: in this line is the Validation Unit, which with independent tests (proportional to the inherent risk of the model) ensures that the model was estimated without flaws and that it has an adequate methodological approach. It is concerned with carrying out tests to ensure the correct functioning of the model once it is productive, as well as compliance with the internal regulatory framework. Its goal is to challenge designed solutions.
 - Third Line: this function is performed by the Comptroller, it is responsible for ensuring that both the first and second lines adhere to the declared management framework, as well as the directions of the Regulator and internal policy.

c) Credit risk appetite

The risk appetite framework establishes the limits within which Management must execute the strategy and conduct the Corporation's business, optimizing the risk-return relationship. Through this, the aim is to understand the risks to which the Bank and its subsidiaries are exposed to manage them proactively.

The conceptual framework of the risk appetite is defined based on the following elements: (1) Corporate risk tolerance statement, (2) Governance and monitoring of risk tolerance ratios and (3) Incorporation of the risk appetite in the key processes.

Having a risk appetite framework makes it possible to ensure prudent and efficient risk taking and helps to conduct the strategy, through regular and systematic analysis of the evolution of material risks and timely communication of the risk profile to the High Administration and Directory.

Different areas and committees of the Bank and its subsidiaries participated in the survey of risks and in the definition of the guiding principles and the dimensions and metrics for their control.

The review of the appetite framework is a process that takes place annually, in accordance with the best practices and main risks present in the Bank and the financial system. Through this process, areas and dimensions of risk are identified, as well as emerging risks (based on the risk identification and assessment process).

Additionally, there is a monthly follow-up and monitoring process of risk appetite ratios, where the following activities are distinguished:

- Monitoring, review, and consolidation of risk tolerance reports of the Bank and subsidiaries.
- Review and monitoring of action plans associated with ratios at risk.

- Sending of results report to risk owners.
- Monthly monitoring report of risk appetite ratios to the Risk Appetite Council and the corresponding executive-level committees (Profitability and Capital Adequacy Committee, Operational Risk Committee, Assets and Liabilities Committee, among others)
- Submission of monthly appetite report to the Management Committee (CDD) and Directors.
- Presentation of the status of corporate risk appetite and the status of current plans in the Finance and Risk Committee.

Figure N° 1: Monthly follow-up scheme and monitoring of risk tolerance ratios

The material risks managed under the appetite framework are as follows: Credit, market and counterparty, liquidity, operational, compliance, strategic, capital adequacy, reputational, models and ESG risk.

In the case of credit risk, they correspond to the economic losses assumed by the Bank and its subsidiaries as a result of non-compliance with the contractual obligations assumed by the counterparties. It is the most relevant risk for the Bank and its subsidiaries, its full and detailed understanding is essential for proper performance.

Compliance with the credit limit for related debtors according to Art.84 No. 2 of the General Law of Banks and RAN 12-4

In accordance with article 84 of the General Bank Law, the relationship of related debtors that affects both natural and legal persons with the Bank occurs when:

- a) Has a direct, indirect or through third party participation in the property of the institution greater than or equal to 5% of the capital.
- b) Participates in the management of the entity: corresponding to those people who, without necessarily having an ownership interest, exercise some degree of control over the decisions of the entity or any of its subsidiaries. Directors, the general manager, the assistant general manager, managers and assistant managers, agents, and persons who are general attorneys-in-fact or serve as advisers to the board of directors, a committee of directors, or management, such as also the prosecutor, the chief lawyer, and the comptroller.

The global limit for all loans granted to groups of people related to the Bank by ownership or management as of June 30, 2023, is 5.75%.

Indicator Name	Regulatory Limit	Jun-23 % On Equity	Jun-23 MCh\$
Total exposure related by management or ownership	100%	5.75%	370,750
Maximum group exposure related to management or ownership (Not Collateralized)	5%	2.14%	138,259

e) Collateral Guarantees and other credit enhancements obtained

The maximum exposure to credit risk is reduced by guarantees, credit enhancements and other actions that mitigate the Bank's exposure. Therefore, the constitution of guarantees in favor of the Bank is a necessary mechanism, but not sufficient for the granting of a loan; therefore, the acceptance of the risk by the Bank will require the verification of other variables such as the payment capacity or generation of resources to mitigate the risk incurred.

The Bank has robust procedures for the management and valuation of its collateral guarantees, for which it has internal regulations, approved by the Corporate Risk Management.

The BCI appraisal process is described below:

The appraisal value corresponds to the value assigned to the asset to receive it as collateral, at the time the appraisal is requested, at a current market value, added to the risks of possible price fluctuations and difficulties in disposing of the asset in the event of having to be liquidated, due to default by the debtor.

Therefore, the value obtained by the appraiser is given by taking into account the different records compiled for its evaluation, taking into account the real transaction values, "offer value according to the market", as well as complementary records of leases or manufacturing of goods. similar characteristics and conditions, existing in the market at the time of appraisal, excluding considerations based on mere expectations regarding the improvement of future conditions.

Appraisal Methodology

The Bank uses various methodologies to determine the value of the appraisal, such as the comparative method or market value, depending on the type of asset to be appraised.

Regardless of the valuation method used, the so-called "settlement value" will be generated, which will consider adjustments to the value of the collateral asset to incorporate in it some of the following aspects, which could affect its value in the future:

- Expected depreciation or obsolescence
- Price Fluctuation Risk
- Execution expenses and marketing costs
- Economic, social, health or war crisis.

Types of guarantees

The guarantees can be grouped between real guarantees and personal guarantees, within the first ones are:

- Property

BANCO DE CRÉDITO E INVERSIONES AND SUBSIDIARIES
NOTES TO THE INTERIM CONSOLIDATED FINANCIAL STATEMENTS
As of June 30, 2023 and December 31, 2022 and for the six and three month-periods ended June 30, 2023 and 2022

They are things that cannot be transported from one place to another, such as land, for example, things or objects that adhere permanently, to which they cannot be transported, such as solid material buildings, bridges, sewers, are also considered real estate., wells, tunnels, aqueducts, etc.

- Movable property

Under this denomination, transferable assets such as machinery, vehicles or any other asset of the company that does not comply with being real estate are understood.

- financial guarantees

They correspond to representative documents of value such as term deposits, pledges on mutual funds, stand-by credit letter or other financial instruments whose issuers are recognized by the CMF.

The so-called personal guarantees include guarantees and solidarity bonds granted by natural or legal persons to support credit operations of third parties.

NOTE 48 – INFORMATION ON REGULATORY CAPITAL AND CAPITAL ADEQUACY RATIOS

a) Regulatory capital strategy and objectives

The management of the Bank's regulatory capital seeks to ensure: (i) a level of capital adequacy in the short, medium, and long term, (ii) a profitability commensurate with the risks assumed by the business units, (iii) compliance with strategic financial objectives and (iv) compliance with internal limits and the regulatory framework.

To this end, the main ratios and metrics associated with capital management are periodically generated, analyzed, and reported to the relevant governing bodies (Profitability and Capital Adequacy Council, Executive Committee and Board of Directors) and the necessary action plans are drawn up.

BCI defines its capital management objectives considering the level of effective equity that the entity considers necessary to maintain both now and, in the future, formally contemplated in its capital planning process and that is consistent with the risks inherent to its activity. to the economic environment in which it operates, its governance, risk management and control systems, its strategic business plan, the quality of the available assets and the real possibilities of obtaining greater own resources.

As of June 2023, the minimum regulatory capital requirement is 9.63%, in accordance with the transitory provisions applicable to the systemic charge and conservation buffer, which is evaluated on an ongoing basis by the regulator.

Banco BCI’s minimum capital requirements as of June 30, 2023 under Basel III guidelines:

	Capital CET1	Capital T1	Capital T2	Total Regulatory Capital
Pillar I	4.50	1.50	2.00	8.00
Pillar II	0.00	0.00	0.00	0.00
Systemic charge (1)	0.38	0.00	0.00	0.38
Conservation buffer (2)	1.25	0.00	0.00	1.25
Countercyclical buffer	0.00	0.00	0.00	0.00
Total	6.13	1.50	2.00	9.63

(1) Systemic charge: considers the gradual incorporation (25% as of December 22) of the total charge of 1.50% of core capital with respect to total risk-weighted assets, as established in the transitory provisions defined in chapter 21-11 of the RAN.

(2) Transitional provisions for the conservation buffer are not considered, considering that they do not apply to compliance with the conditions required in chapter 1-13 of the RAN to maintain an A solvency rating.

b) Policies and processes for capital management

To achieve the objectives, regulatory capital management will be articulated based on the following essential elements, in line with chapter 21-13 of the RAN on the evaluation of the sufficiency of effective equity of banks:

Identification and evaluation of risks: Senior Management must perform the corporate risk identification and evaluation process to assess the material risks to which the Bank and its subsidiaries are exposed.

Tolerance framework: There must be a tolerance framework that ensures the conduct of business within the established and approved risk ranges. The most relevant risks must have limits and regular monitoring by Senior Management.

Determination of an internal capital objective: The Bank must establish an internal capital objective higher than the minimum requirements established in article 66 of the LGB, which will be approved by the Board of Directors.

Stress tests: There must be a corporate stress testing program that identifies possible vulnerabilities and allows analysis of the ability to generate results and the adequacy of capital under severe, low probability but plausible scenarios. Additionally, the bank must have capital recovery plans that allow it to meet the target solvency levels.

Corporate strategic planning and monitoring process: The strategic planning process must be developed continuously considering a reflection and adaptation of the strategy, the prioritization of resource allocation, the definition of financial planning with a prospective vision, the setting of goals and the monitoring of strategic objectives.

Monitoring and follow-up: Adequate monitoring and follow-up systems must be established for risk assessment that allow effective supervision of compliance with business plans and determine how the incidence of changes in the risk profile could translate into capital requirements. additional.

Internal control: The internal control structure is a fundamental part of the capital evaluation process. Effective control over the capital evaluation process must incorporate an independent review, and when required, the involvement of internal auditors and/or an external audit firm.

c) External capital requirement

BCI manages the capital considering the definition of articles 66, 55 and 55bis of the LGB and chapter 21-1 of the RAN on equity for legal and regulatory purposes and is made up of basic capital (common equity tier 1 capital or CET1), additional tier 1 capital (AT1) and tier 2 capital (T2).

The CET1 corresponds to subscribed and paid shares plus the other items that are part of the accounting equity of the banks, with a floor of 4.5% of the RWA.

BANCO DE CRÉDITO E INVERSIONES AND SUBSIDIARIES
NOTES TO THE INTERIM CONSOLIDATED FINANCIAL STATEMENTS
As of June 30, 2023 and December 31, 2022 and for the six and three month-periods ended June 30, 2023 and 2022

AT1 is defined in chapter 21-2 of the RAN and corresponds to preferred shares and bonds without a fixed maturity date, subordinated to T2 and subject to capitalization, depreciation and re-appreciation or expiration, depending on the issuance conditions. The LGB imposes a floor of 6% of the RWAs for Tier 1 capital (CET1+AT1).

T2 is made up of fixed-term bonds, subordinated to other obligations, for up to 50% of CET1, plus voluntary provisions (whatever exceeds the specific ones) for up to 1.25% of APRC, net of required provisions, when the banks use standardized methodologies to calculate the denominator, or 0.625%, in the case of using their own methodologies.

The minimum effective regulatory capital is specific to each bank, and depends on the base capital requirement, its systemic quality (systemic charge) and the additional capital required for the assessment of the adequacy of effective capital (Pillar 2).

On top of this specific minimum for each bank, basic capital buffers are added: the conservation and counter-cyclical buffer for solvency level A classification.

On March 31, 2023, the CMF approved to maintain the systemic quality of six banks in Chile, of which the Bank is among them. This rating is governed by requirements framed in RAN 21-11, which considers a systemic importance index per entity, the factors considered are the following:

- Bank size
- Interconnection with other financial entities
- Difficulty of replacing the Bank in the provision of financial services.
- Complexity of its business model and operating structure.

In the case of the Bank, the additional core capital charge increased from 1.5% to 1.75%. This increase is mainly due to the growth in the Bank's participation in the factors of size, interconnectedness and complexity, These higher requirements are applied gradually, so that the additional core capital charges due in December 2023 will be equivalent to 50% of such percentage.

Additionally, on May 23, 2023, the board of the Central Bank of Chile, at its financial policy meeting, agreed to activate the countercyclical capital requirement at a level of 0.5% of risk-weighted assets; This requirement will be enforceable within one year and must be included in the May 2024 solvency report. The requirement is activated in accordance with the capital standards implemented by Basel III, which are in line with the provisions of the third paragraph of RAN 21-12, which frames the provisions of Article 66 ter of the General Banking Law.

As of June 30, 2023 and December 31, 2022, total assets, risk-weighted assets, and components of effective equity are as follows:

		Global Consolidated 06-30-2023 MCh\$	Global Consolidated 12-31-2022 MCh\$	Local Consolidated 06-30-2023 MCh\$	Local Consolidated 12-31-2022 MCh\$
