CONFERENCE CALL

2Q 2026

This presentation includes references to certain non-GAAP measures. We believe these non-GAAP measures provide useful information to both management and investors. These non-GAAP measures should not be considered in isolation or as a substitute for measures of performance prepared in accordance with U.S. GAAP and may be different from non-GAAP measures used by other companies. In addition, these non-GAAP measures are not based on any comprehensive set of accounting rules or principles. Non-GAAP measures have limitations in that they do not reflect all of the amounts associated with our results of operations as determined in accordance with U.S. GAAP. These non-GAAP financial measures should only be used to evaluate our results of operations in conjunction with the most comparable U.S. GAAP financial measures.

The 2026 financial guidance contained in this presentation reflects management's current assumptions regarding numerous evolving factors that are difficult to accurately predict. [Reconciliations of forward-looking non-GAAP measures to the relevant forward-looking GAAP measures are not being provided, as we do not currently have sufficient data to accurately estimate the variables and individual adjustments for such guidance and reconciliations. The 2023 financial guidance includes forward-looking statements.

CET1 increased by 16 bps year-on-year, reaching 11.26% as of June 2026. The improvement reflects internal capital generation outpacing the growth in **risk-weighted asset** associated with **business expansion**, resulting in a stronger capital position.

The increase in CET1 was partially offset by **higher regulatory deductions** following the full phase-in of Basel III transitional arrangements from December 2025.

Effective equity continued to strengthen, increasing year-on-year, supported by **retained earnings** and **solid profit generation.**

We have adopted IFRS 9 “Financial Instruments” (previously IAS 39). However, the Financial Market Commission (CMF, according to the Spanish acronym) excluded the application of the methodology to calculate the expected credit risk loss for loans, which will continue to be calculated using the expected loss models defined by the CMF, our local regulator. Besides this modification, there were other regulatory modifications that we disclosed in our annual financial statements concerning accounting criteria and the presentation of the financial statements. These modifications of our accounting policies and of the presentation of our financial statements require the 2021 figures to be stated off the books (pro forma) to comply with the comparability principle of the IFRS, due to the implementation as of January 2022 of the new accounting regulation requirements of the CMF in its Compendium of Accounting Regulations for Banks. Lastly, it should be indicated that besides issuing the consolidated financial statements of the Bank, we will also include a new financial report on management comments that will be published jointly on our website on August 12th, 2022. If you have any further queries about this new format, do not hesitate to contact the IR team.
