

Emergency Drills and Plans

Every year, BCI and its subsidiaries carry out various activities in order to be prepared for an emergency. One of these activities are evacuation drills, which are designed to prepare for emergencies caused by natural disasters (earthquakes, tsunamis, volcanic eruptions, or landslides) or human causes (assaults, fires, or public disturbances). In 2024, we conducted a total of 200 drills throughout Chile, which is equivalent to 100% compliance with the annual program.

2024	
Region	Amount
Arica y Parinacota	2
Tarapacá	6
