Funding Sources

- Our long-term funding is built on a strong foundation of local inflation-indexed (UF) bonds in the Chilean market. This is strategically complemented by international issuances through our EMTN program, providing access to diverse capital markets in key currencies like the US Dollar, Euro, Swiss Franc, and others.
- This diversified approach ensures the Bank optimizes all financing opportunities while actively managing interest rate risk.
 - The long-term debt matches our long-term residential mortgage portfolio.
 - Short-term funding coming from commercial paper program managed out of its Miami branch which provides an additional source of US dollar funding.
